# **Undervoltage Sensing Circuit**

The MC34064 is an undervoltage sensing circuit specifically designed for use as a reset controller in microprocessor-based systems. It offers the designer an economical solution for low voltage detection with a single external resistor. The MC34064 features a trimmed-in-package bandgap reference, and a comparator with precise thresholds and built-in hysteresis to prevent erratic reset operation. The open collector reset output is capable of sinking in excess of 10 mA, and operation is guaranteed down to 1.0 V input with low standby current. The MC devices are packaged in 3-pin TO-92, micro size TSOP-5, 8-pin SOIC-8 and Micro8™ surface mount packages. The NCV device is packaged in SOIC-8 and TO-92.

Applications include direct monitoring of the 5.0 V MPU/logic power supply used in appliance, automotive, consumer and industrial equipment.

#### **Features**

- Trimmed-In-Package Temperature Compensated Reference
- Comparator Threshold of 4.6 V at 25°C
- Precise Comparator Thresholds Guaranteed Over Temperature
- Comparator Hysteresis Prevents Erratic Reset
- Reset Output Capable of Sinking in Excess of 10 mA
- Internal Clamp Diode for Discharging Delay Capacitor
- Guaranteed Reset Operation with 1.0 V Input
- Low Standby Current
- Economical TO-92, TSOP-5, SOIC-8 and Micro8 Surface Mount Packages
- NCV Prefix for Automotive and Other Applications Requiring Site and Control Changes
- These Devices are Pb-Free and are RoHS Compliant

This device contains 21 active transistors.

Comparator hysteresis can be increased with the addition of resistor  $R_H.$  The hysteresis equation has been simplified and does not account for the change of input current  $l_{in}$  as  $V_{CC}$  crosses the comparator threshold (Figure 4). An increase of the lower threshold  $\Delta V_{th(lower)}$  will be observed due to  $l_{in}$  which is typically 340  $\mu A$  at 4.59 V. The equations are accurate to  $\pm 10\%$  with  $R_H$  less than 150  $\Omega$  and  $R_L$  between 1.5  $k\Omega$  and 10  $k\Omega$ .
