Honeywell
 AC Series

## MICRO SWITCH ${ }^{\text {TM }}$ AC Series Door Switches

When the application is more complex than a "stand alone" switch can provide, consider the MICRO SWITCH ${ }^{\text {TM }}$ AC Series Door Switch. The AC Series switch assembly monitors the position of a service door or panel whether "closed" or "open". The AC Series switches are a compact switch assembly designed for equipment applications ranging from vending machine service doors or panels, monitoring doors for truck trailers, and military-related doors and/or panels. When the equipment (door or panel, etc.) which is electrically interlocked through the AC Series switch is opened, the action of the AC Series switch disconnects the electrical power. The AC Series switch can provide an electrical signal to an annunciator circuit such as a light or horn indicating the door or panel is open. Another feature that is common to most AC Series switch assemblies is a "pull-to-override" position which allows the service door to be open and yet apply electrical power through the switch assembly. The "pull-to-override" switch position could be useful for trouble shooting equipment as required.
AC Series switch assemblies are available with up to four switch elements which can provide discrete outputs as required for control and/or indicator circuits. Select catalog listings are available with UL and CSA agency certification. Where the application is military related, catalog listings are available with a military specification part number.

## What makes our switches better?

- Available with Honeywell MICRO SWITCH ${ }^{\text {TM }}$ V3, V7, SM, SE, or BZ Series switches; there are no exposed contacts
- Temperature ranges ( $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}\left[-40^{\circ} \mathrm{F}\right.$ to $\left.185^{\circ} \mathrm{F}\right]$ ) allow for reliable performance usage in harsh conditions
- Many catalog listings have internal threaded actuators that allow customers to attach auxiliary plungers
- Choice of switch actuation: two position momentary, two position momentary with a twist-latch feature, or a three position with push momentary and pull maintained action

Right form factor combined with the right operating characteristics make a precise combination for door switch applications.

## RELIABLE PERFORMANCE

The switch automatically disconnects electrical power to equipment when service door, panel, or drawer is opened.

## CHOICE OF SWITCH ACTUATION

Choose the standard switch assembly with one of three mechanical positions: push-momentary with a pull-to-override maintained position, the two position momentary switch assembly, or the two position switch assembly with a pushmomentary and a push-and-turn-to-latch maintained position.

## Enhanced switch offerings

## MOUNTING EASE

The switch assembly is designed to be installed as a side mount or end mount for versatility.

## WIDE ELECTRICAL RANGE

Wide range of current from less than 1 A to 21 A to interface with control and signal circuits.

## Tough answer for tough door interlock needs

## AGENCY CERTIFICATIONS

Select switch assemblies are certified to CSA and UL component recognition where agency certification is desired or required. When the application involves military requirements, several different styles of AC Series door switches are offered with military specifications.

## CIRCUIT FLEXIBILITY

Switch assemblies are available with single throw or double throw action with up to four poles to provide control circuits and optional signal circuits as required.

## TERMINATION OPTIONS

Two different types of switch termination (screw or quick connect blades) are available to meet machine design requirements.

## Potential Applications

## VENDING MACHINES

Indicates front panel of vending machine is closed

## HVAC EQUIPMENT

Serves as interlock for one or more service panels

## APPLIANCES

Equipped as interlock for service panels or access panels

## COMMUNICATION EQUIPMENT

Provides interlocking capability for service or access panels

## BUSINESS EQUIPMENT

Provides interlocking capability for service or access panels

## TRUCK TRAILER OR SEMI-TRUCK TRAILER DOORS

Indicates the door is closed and/or latched

COMMERCIAL DOORS AND GATES
Monitors the door or gate is open or closed

## MILITARY EQUIPMENT

Serves as a cabinet and service panel interlock for land-based electrical/electronic equipment

## AWARNING PERSONAL INJURY <br> DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury. <br> Failure to comply with these instructions could result in death or serious injury.

## AWARNING MISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.
Failure to comply with these instructions could result in death or serious injury.

## WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While we provide application assistance personally, through our literature and the Honeywell website, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

## Find out more

Honeywell serves its customers through a worldwide network of sales offices, representatives and distributors. For application assistance, current specifications, pricing or name of the nearest Authorized Distributor, contact your local sales office.
