# Coaxial Reflectionless **Low Pass Filter**

DC to 11 GHz 50Ω

## **ZXLF Series**

### The Big Deal

- · Patented design terminates Stopband signals
- Stopband up to 35 GHz
- High Stopband rejection, up to 50 dB

### **Product Overview**

Mini-Circuits' ZXLF Series reflectionless filters employs a novel filter topology which absorbs and terminates stop band signals internally rather than reflecting them back to the source. Reflectionless filters eliminate stopband reflections, allowing them to be paired with sensitive devices and used in applications that otherwise require circuits such as isolation amplifiers or attenuators. This is developed in a new broadband, stable connectorized package.

## **Key Features**

Feature	Advantages
Easy integration with sensitive reflective components, e.g. mixers, multipliers	Reflectionless filters absorb unwanted signals, preventing reflections back to the source. This reduces generation of additional unwanted signals without the need for extra com- ponents like attenuators, improving system dynamic range.
Cascadable	Reflectionless filters can be cascaded in multiple sections to provide sharper and higher attenuation, while also preventing any standing waves that could affect pass band signals.
Excellent stability over temperature	Minimal variation in electrical performance across temperature.
Operating temperature up to 105°C	Suitable for operation close to high power components.
Broadband connectorized package	The connectorized package works well even in high frequencies and easy to interface with other devices. This is well suited for test setups.

# Coaxial Reflectionless Low Pass Filter

**50**Ω DC to 6000 MHz

# **ZXLF-K662M+**

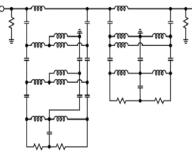

**Features** 

- Match to 50Ω in the stop band, eliminates undesired reflections
- Cascadable
- Temperature stable, up to 105°C
- Protected by US Patents 8,392,495; 9,705,467,
- additional patent pending
- Protected by China Patent 201080014266.1
- Protected by Taiwan Patent I581494

#### Applications

- Telecomm
- 5G & WiFi

#### **Functional Schematic**

**Typical Frequency Response**
