

LENOX Demolition CT™ Reciprocating Saw Blade

1832146

- Carbide Tipped for high performance cutting in nail-embedded wood
- Up to 5X longer life than Bi-Metal recip blades
- Engineered for faster performance
- Each tooth is precision ground to cut through nails easily
- 6 TPI for successive extreme nail embedded wood cutting

The LENOX Demolition CT™ Reciprocating Saw Blade 6 TPI has been carbide tipped for high performance cutting in nail embedded wood. The carbides are welded onto the blade with the latest technology for increased durability, helping to prevent tooth loss for longer blade life. The blade has been designed to be taller and thicker, compared to traditional blades for maximum durability in tough demolition applications. Engineered for faster performance, each tooth is precision grounded.

Specifications	
TPI	6
Size	305 x 22 x 1.3 mm
Blade Quantity	1
