

High Efficiency LED, Ø 5 mm Tinted Diffused Package

19223

DESCRIPTION

The tinted diffused 5 mm green LED series was developed for standard applications like general indicating and lighting purposes. It is using AlInGaP chip technology and includes the standard versions TLHG542. with stand-off and TLHG642... without stand-off. The wide viewing angle of these devices provides a high on-off contrast.

All LEDs are categorized in luminous intensity groups.

That allows users to assemble LEDs with uniform appearance.

	MIN.	MAX.
STANDARD		
Q	6.3	12.5
R	10	20
S	16	32

Note

- Luminous flux is tested at a current pulse duration of 25 ms and an accuracy of $\pm 10\%$.
The above type numbers represent the order groups which include only a few brightness groups. Only one group will be shipped on each bag (there will be no mixing of two groups in each bag).
In order to ensure availability, single brightness groups will not be orderable.
In a similar manner for colors where wavelength groups are measured and binned, single wavelength groups will be shipped on any one bag.
In order to ensure availability, single wavelength groups will not be orderable
