## 8D Series

## Presentation

Since the early 80 's, SOURIAU is a major supplier of 38999 Series III, the screw-coupled version of MIL-C-38999. Present on the main international programs, SOURIAU has developed a range of products that meet the performance required in extreme environments. This product family is in accordance with MIL-DTL-38999 Series III, EN3645, CECC (standard for bronze shell), and also meets many customers' standards (Rolls Royce, ABS, BACC, ...)

This evolution of MIL-C-38999 allows:

- A high contact density up to 128 contacts \#22D
- A quick screw coupling with self locking mechanism
- High resistance to harsh environments (vibration, $200^{\circ} \mathrm{C}$ )

Always at the cutting edge of innovation, SOURIAU's teams have continuously improved this range of connectors:

- Composite version in the 90's (Its choice is recommended wherever weight is critical)
- Titanium version for weight saving and very high and mechanical resistance
- Today SOURIAU remains innovative with cadmium free and RoHS solutions. In 2009 SOURIAU was the first to be QPL qualified for Zinc Nickel plating.

## Insertion of wire in contact barrel

When inserting the stripped wire into the contact barrel check that no strands are left outside and that the wire is visible through the wire inspection hole in the barrel.

Important:

- Slide any accessories over wire strands before carrying out the following operations.
- Contacts are inserted and extracted from the rear of the connector.

## Insertion of the contacts

1 - Engage the crimp cable / contact asembly into the longitudinal slot of the plastic tool (coloured tip).
Slide the tool down the cable until the tip of the tool abuts the contact retention shoulder.

2 - Introduce the contact into the required contact cavity in the insulator, pushing tool axialy, until the contact snaps into position in clip.

## Extraction of the contacts

1 - Engage the appropriate cable into the longitudinal slot of the tool with the white tip towards connector.

2 - Slide the tool down towards the contact. Insert the tool in the insulator until it abuts the contact shoulder.

3 - Holding the tool-contact and cable assembly together, remove them simultaneously.

## 8D Series <br> ELIOBEAM Fiber Optic Contact

## Principle of expanded beam

The expanded beam concept expands and collimates the beam from the launch fiber. Without mechanical contact of the optical elements, the beam remains collimated until it is focused down to the receiving fiber.

The beam expansion at the interface provides protection of the fiber from contaminants.

## 8DV Series High Vibration Reinforced Locking

## 8DV overview

- Full stainless steel design giving the plug the necessary robustness for harsh environments: vibration, fire resistance, corrosion, temperature peak up to $260^{\circ} \mathrm{C}$.
- Coupling with all types of D38999 receptacles and M85049 backshells.
- Reduced contact fretting, contact conductivity guaranteed.
- Security lock with vibration levels beyond D38999 standards values. The lock-on system increases the pressure force between plug and receptacle: excellent electrical conductivity between boxes coupled.
- Easy implementation of rear accessories at high temperatures when harnessed
- Basic mechanical, electrical and environmental characteristics are identical to stainless steel D38999 connectors.

## Product range extension

## mïcre38999

A complete miniature range: threaded (8DA), break away (8BA) \& bayonet (8LTA). Space saving with scoop proof connector for harsh applications.

## A compact solution:

Diameter up to 45\% smaller than size 9 (D38999).
Up to 50\% shorter.
Integrated backshell: Cost and space saving

## A high density solution:

With \#26 contacts (according to 39029).
5 layouts (size 3, 5 and 7 with \#22 \& \#26).

## Excellent features:

Designed for D38999 requirements.
IP67 sealing when mated.
Stainless steel shell (1500 matings) \& aluminum shell ( 500 matings).
RoHS and Cadmium free:
Available in zinc nickel (RoHS) plating, as well as nickel and olive drab cadmium.

## ELIO ${ }^{\circledR}$ Fiber Optic Hermetic

Hermetic receptacles or feedthrough based on 38999 shells, intermateable with 38999 Series III plug populated ELIO ${ }^{\circledR}$ contacts.

Truly hermetic:
Leak rate: < $10^{-9} \mathrm{~atm} . \mathrm{cm}^{3} / \mathrm{s}$.
Temperature range: $-55^{\circ} \mathrm{C}$ to $200^{\circ} \mathrm{C}$.
Wide range of layouts:
From 1 to 24 fiber optic channels.
Customs:
Versatile technology that can be adapted to your needs.

## Product range extension

## Rack \& Panel

Sealed rack \& panel for blind connection. A 100\% scoop proof connector with quick connection in hard-to-reach areas.

## Blind connection:

Easy \& fast connection without any coupling/uncoupling between a float-mounting unit \& a fixed unit.

Float-mounting unit - rack:
Female crimp contacts.
Mounting on the cabinet side.
Angular orientation with a key.
Possibility to supply rear accessories.
Misalignment catching:
Longitudinal, axial and angular.

## 230V Connector

The use of higher voltage to reduce cable weight has lead to the development of double voltage connectors.

## Robust design and materials:

In high altitude un-pressurized areas, higher voltages increase electrical partial discharges: Risk of contact short circuits.
Our 230V connector avoids this risk!
No possible mismatch:
Specific T and V clocking to avoid mating with a non 230 V
qualified counterpart.

## Flexible offering:

Available in standard watertight and hermetic connectors with the same performance.
Available in composite and stainless steel shells.

## Product range extension

## 8D8/8D9 Series

8D8: high vibration push-pull connector.
8D9: lanyard release, high performance 38999 quick release.

A wide range with excellent performances:
MIL-DTL-38999 layouts and contacts.
MIL-DTL-38999 Series electric performances.
Scoop proof.
Compatible with standard backshells 38999 Series III.
Very high performance coupling with ball locking concept, check of locking by free ring when mated.

Easy to connect-disconnect:
8D8: ideal for restricted space mating.
8D9: simple push to connect - pull to disconnect.
High vibration performance:
Up to 44 g
8D8: ideal for mil-aero and space applications.
8D9: ideal for missiles, inter-stage separation, UAVs, space
 probes.

## 8DB Bulkhead Feedthrough

Double Receptacle mounted on panel allows cable plug connection on both sides of the bulkhead. Create a permanent sealed barrier on your panel suitable for pressurized or depressurized areas.

## Easy integration:

Standard 38999 mounting interface (square flange, jam nut).
Easy modular assembly and connection.
Time saving for maintenance.
The ideal interconnect solution for aircraft pressurized/non pressurized panels.

Reinforced sealing:
Feedthrough sealing even when unmated ( $10^{-6} \mathrm{~atm} . \mathrm{cm}^{3} / \mathrm{s}$ ).
Permanent sealing barrier on panel ( $\mathrm{O}^{\prime}$ rings).
Glass fused hermetic version available ( $<10^{-8} \mathrm{~atm} . \mathrm{cm}^{3} / \mathrm{s}$ ) for fuel tanks/space systems.

A large platform available:
All 38999 Series III layouts (signal and power contacts).

## Product range extension

## 8PS Series

Sealed cable feedthrough. Allows a bundle of cables to cross through the bulkhead without any contact junctions.

All cables are individually sealed inside the feedthrough: For maximum MTBF by eliminating cable termination and contact junction.
When maximum continuity is required for copper cables.
To suppress contact attenuation with Fiber optic cables.
Easy and safe installation.
Reinforced sealing.

## 8TFD Filter Connector

EMI-RFI filters and lightning protection in composite light-weight shell.

## Space saving:

Complete filter solution in standard shell.
No need for filter PCB inside equipment.
Smaller equipment envelope required.

## Excellent filter performance:

Excellent performance, comparable to aluminum shell EMI-RFI filter connectors.

Highly corrosion resistant:
2000 hours salt spray in either nickel or olive drab finish.
Wide range of layouts available:
SOURIAU EMI-RFI Filter 38999 Series III connectors are available in aluminum, marine bronze, and stainless steel shells.
