

**SERIES:** P78E-1000 | **DESCRIPTION:** NON-ISOLATED DC SWITCHING REGULATOR
**FEATURES**

- 1 A of output current
- efficiency up to 96%
- industry standard SIP package
- industrial operating temp -40~+85°C
- drop in equivalent LM78 regulator
- no load input current of 0.2 mA
- output short circuit protection on output
- EN 62368-1

**MODEL**

| MODEL       | input voltage <sup>1</sup> |                | output voltage<br>(Vdc) | output current<br>max<br>(mA) | output power<br>max<br>(W) | ripple & noise <sup>2</sup><br>max<br>(mVp-p) | efficiency <sup>3</sup><br>typ<br>(%) |
|-------------|----------------------------|----------------|-------------------------|-------------------------------|----------------------------|-----------------------------------------------|---------------------------------------|

|             | 12                         | 8~20           | -12                     | -300                          | 3.6                        | 75                                            | 88                                    |
| P78E15-1000 | 24                         | 20~36          | 15                      | 1000                          | 15                         | 75                                            | 96                                    |
|             | 12                         | 8~18           | -15                     | -300                          | 4.5                        | 75                                            | 87                                    |

- Notes:
1. For input voltages higher than 30 Vdc, a 22  $\mu$ F / 50 V input capacitor is required.
  2. Tested at nominal input, 20~100% load, 20 MHz bandwidth, with 10  $\mu$ F electrolytic and 1  $\mu$ F ceramic capacitor on the output. At loads below 20%, the max ripple and noise of the 3.3 & 5 Vdc outputs will be 100 mVp-p, and the other outputs will be 2% Vo.
  3. Measured at min Vin, full load.
  4. All specifications are measured at Ta=25°C, humidity < 75%, nominal input voltage, and rated output load unless otherwise specified.

**PART NUMBER KEY**

## INPUT

| parameter                            | conditions/description           | min | typ | max | units |
|--------------------------------------|----------------------------------|-----|-----|-----|-------|
| operating input voltage <sup>5</sup> | for positive output applications | 6   |     | 36  | Vdc   |
|                                      | for negative output applications | 8   |     | 27  | Vdc   |
| filter                               | capacitor filter                 |     |     |     |       |
| input reverse polarity protection    | no                               |     |     |     |       |
| no-load input current                | positive outputs                 |     | 0.3 | 1   | mA    |
|                                      | negative outputs                 |     | 1   | 4   | mA    |

Note: 5. See Model section on page 1 for specific input voltage ranges.

## OUTPUT

| parameter                            | conditions/description                         | min | typ  | max   | units |
|--------------------------------------|------------------------------------------------|-----|------|-------|-------|
| maximum capacitive load <sup>6</sup> | for positive output applications               |     |      | 680   | μF    |
|                                      | for negative output applications               |     |      | 330   | μF    |
| voltage accuracy                     | at full load, input voltage range              |     | ±2   | ±4    | %     |
|                                      | 3.3 Vdc output model                           |     | ±1.5 | ±3    | %     |
|                                      | all other models                               |     |      |       | %     |
| line regulation                      | at full load, input voltage range              |     | ±0.2 | ±0.4  | %     |
| load regulation                      | at nominal input, 10~100% load                 |     |      |       |       |
|                                      | positive output applications                   |     | ±0.4 | ±0.6  | %     |
|                                      | negative output applications                   |     | ±0.4 | ±0.8  | %     |
| switching frequency                  | at nominal input voltage, full load            |     | 520  |       | kHz   |
| transient recovery time              | at nominal input voltage, 25% load step change |     |      | 1     | ms    |
| transient response deviation         | at nominal input voltage                       |     | ±60  | ±200  | mV    |
| temperature coefficient              | at full load                                   |     |      | ±0.03 | %/°C  |

Note: 6. The maximum capacitive load was tested at nominal input voltage, full load.

## PROTECTIONS

| parameter                | conditions/description    | min | typ | max | units |
|--------------------------|---------------------------|-----|-----|-----|-------|
| short circuit protection | continuous, auto recovery |     |     |     |       |

## SAFETY AND COMPLIANCE

| parameter           | conditions/description                                                                  | min       | typ | max | units |
|---------------------|-----------------------------------------------------------------------------------------|-----------|-----|-----|-------|
| safety approvals    | certified to 62368-1: EN                                                                |           |     |     |       |
| conducted emissions | CISPR32/EN55032, class B (external circuit required, see Figure 4/5-b)                  |           |     |     |       |
| radiated emissions  | CISPR32/EN55032, class B (external circuit required, see Figure 4/5-b)                  |           |     |     |       |
| ESD                 | IEC/EN61000-4-2, contact ± 4kV, class B                                                 |           |     |     |       |
| radiated immunity   | IEC/EN61000-4-3, 10V/m, class A                                                         |           |     |     |       |
| EFT/burst           | IEC/EN61000-4-4, ± 1kV, class B (external circuit required, see Figure 4/5-a)           |           |     |     |       |
| surge               | IEC/EN61000-4-5, line-line ± 1kV, class B (external circuit required, see Figure 4/5-a) |           |     |     |       |
| conducted immunity  | IEC/EN61000-4-6, 3 Vr.m.s, class A                                                      |           |     |     |       |
| MTBF                | as per MIL-HDBK-217F, 25°C                                                              | 2,000,000 |     |     | hours |
| RoHS                | yes                                                                                     |           |     |     |       |

## ENVIRONMENTAL

| parameter             | conditions/description | min | typ | max | units |
|-----------------------|------------------------|-----|-----|-----|-------|
| operating temperature | see derating curves    | -40 |     | 85  | °C    |
| storage temperature   |                        | -55 |     | 125 | °C    |
| storage humidity      | non-condensing         |     |     | 95  | %     |

## TYPICAL APPLICATION CIRCUIT

**Figure 3**  
Positive and Negative Output Paralleling Application Circuit

**Table 1**  
External Capacitor Table

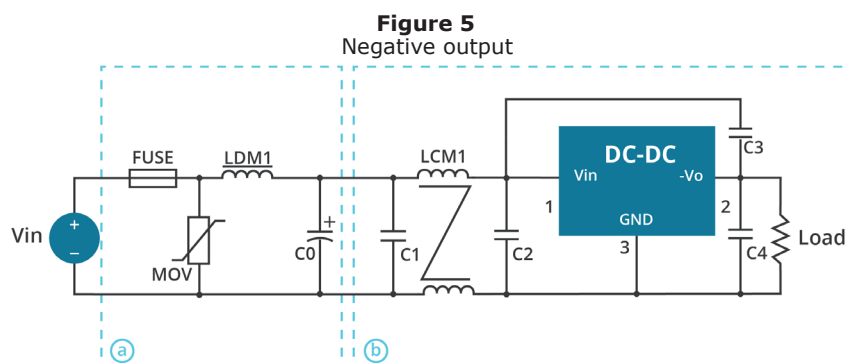

| Model Number | C1, C3<br>(ceramic capacitor) | C2, C4<br>(ceramic capacitor) |
|--------------|-------------------------------|-------------------------------|
| P78E03-1000  | 10 $\mu$ F/50 V               | 22 $\mu$ F/10 V               |
| P78E05-1000  | 10 $\mu$ F/50 V               | 22 $\mu$ F/10 V               |
| P78E09-1000  | 10 $\mu$ F/50 V               | 22 $\mu$ F/16 V               |
| P78E12-1000  | 10 $\mu$ F/50 V               | 22 $\mu$ F/25 V               |
| P78E15-1000  | 10 $\mu$ F/50 V               | 22 $\mu$ F/25 V               |

## EMC RECOMMENDED CIRCUIT

**Table 2**  
Recommended external circuit components

| Component | Value                                    |
|-----------|------------------------------------------|
| FUSE      | choose according to actual input current |
| MOV       | 20D470K                                  |
| LDM1      | 82 $\mu$ H                               |
| C0        | 680 $\mu$ F/50 V                         |
| LCM1      | 4.7 mH                                   |
| C1, C2    | 4.7 $\mu$ F/50 V                         |
| C3        | 10 $\mu$ F/50 V                          |

**Table 3**  
Recommended external circuit components

| Component  | Value                                    |
|------------|------------------------------------------|
| FUSE       | choose according to actual input current |
| MOV        | 20D470K                                  |
| LDM1       | 82 $\mu$ H                               |
| C0         | 680 $\mu$ F/50 V                         |
| LCM1       | 4.7 mH                                   |
| C1, C3, C4 | 4.7 $\mu$ F/50 V                         |
| C2         | 10 $\mu$ F/50 V                          |

- Note:
- C1 & C2 (C3 & C4) are required and should be connected as close to the module pins as possible.
  - To reduce the output ripple further, C2 & C4 can be increased as needed and the use of tantalum or low ESR electrolytic capacitors would be recommended.
  - When using application circuit in Figure 3, a 10  $\mu$ H LDM component is recommended to reduce the interference.

## REVISION HISTORY

However, no responsibility is assumed by CUI for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

CUI products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
