Soder-Wick® Rosin SD

Soder-Wick® offers the state of the art in desoldering technology. Soder-Wick® is designed for today's heat sensitive electronic components using lighter mass, pure copper braid construction that allows for better thermal conductivity, even at low temperatures. Soder-Wick® responds faster than conventional desoldering braids thereby minimizing overheating and preventing PCB damage.

FEATURES & BENEFITS

APPLICATIONS

ADDITIONAL INFORMATION

- » Soder-Wick® Rosin packaged in ESD-safe static dissipative bobbins
- » Minimizes the risk of damage associated with static electricity
- » Noncorrosive ultra high purity Type R rosin flux
- » Minimizes the risk of heat damage to the board
- » Will not leave ionic contamination on the boards
