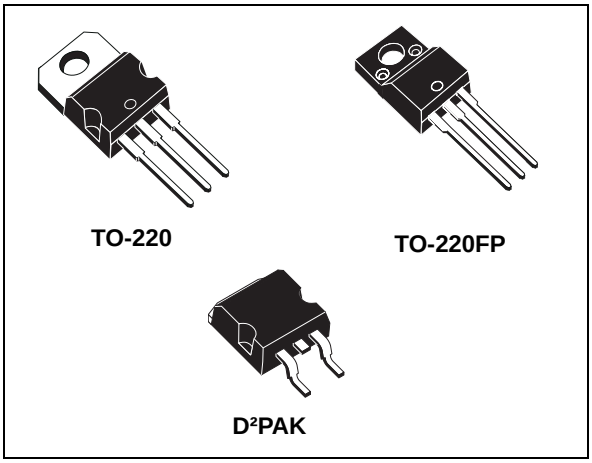
LM217, LM317

1.2 V to 37 V adjustable voltage regulators

Datasheet - production data



Description

The LM217, LM317 are monolithic integrated circuits in TO-220, TO-220FP and D²PAK packages intended for use as positive adjustable voltage regulators. They are designed to supply more than 1.5 A of load current with an output voltage adjustable over a 1.2 to 37 V range. The nominal output voltage is selected by means of a resistive divider, making the device exceptionally easy to use and eliminating the stocking of many fixed regulators.

Features

- Output voltage range: 1.2 to 37 V
- Output current in excess of 1.5 A
- 0.1 % line and load regulation
- Floating operation for high voltages
- Complete series of protections: current limiting, thermal shutdown and SOA control

Table 1. Device summary

2 Maximum ratings

Table 2. Absolute maximum ratings

Symbol	Parameter		Value	Unit
$V_I - V_O$	Input-reference differential voltage		40	V
I_O	Output current		Internally limited	A
T_{OP}	Operating junction temperature for:	LM217	- 25 to 150	°C
		LM317	0 to 125	
		LM317B	-40 to 125	
P_D	Power dissipation		Internally limited	
T_{STG}	Storage temperature		- 65 to 150	°C

Note: Absolute maximum ratings are those values beyond which damage to the device may occur. Functional operation under these condition is not implied.

Table 3. Thermal data

Symbol	Parameter	D²PAK	TO-220	TO-220FP	Unit
R_{thJC}	Thermal resistance junction-case	3	5	5	°C/W
R_{thJA}	Thermal resistance junction-ambient	62.5	50	60	°C/W

6 Application information

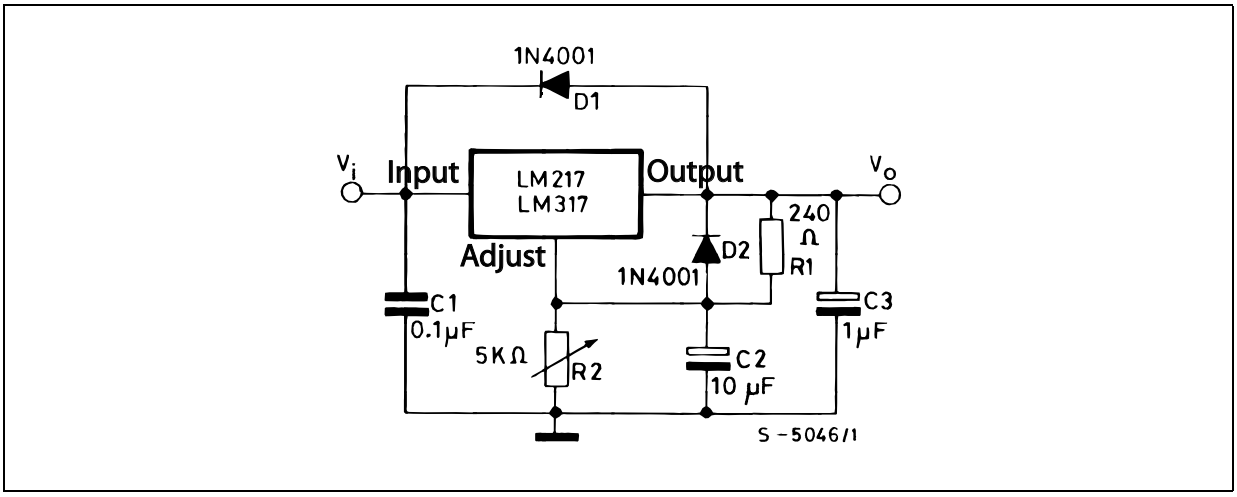
The LM217, LM317 provides an internal reference voltage of 1.25 V between the output and adjustments terminals. This is used to set a constant current flow across an external resistor divider (see *Figure 6*), giving an output voltage V_O of:

$V_O = V_{REF} (1 + R_2/R_1) + I_{ADJ} R_2$

The device was designed to minimize the term I_{ADJ} (100 µA max) and to maintain it very constant with line and load changes. Usually, the error term $I_{ADJ} \times R_2$ can be neglected. To obtain the previous requirement, all the regulator quiescent current is returned to the output terminal, imposing a minimum load current condition. If the load is insufficient, the output voltage will rise. Since the LM217, LM317 is a floating regulator and "sees" only the input-to-output differential voltage, supplies of very high voltage with respect to ground can be regulated as long as the maximum input-to-output differential is not exceeded. Furthermore, programmable regulators are easily obtainable and, by connecting a fixed resistor between the adjustment and output, the device can be used as a precision current regulator. In order to optimize the load regulation, the current set resistor R_1 (see *Figure 6*) should be tied as close as possible to the regulator, while the ground terminal of R_2 should be near the ground of the load to provide remote ground sensing. Performance may be improved with added capacitance as follow:

- An input bypass capacitor of 0.1 µF
- An adjustment terminal to ground 10 µF capacitor to improve the ripple rejection of about 15 dB (C_{ADJ}).
- An 1 µF tantalum (or 25 µF Aluminium electrolytic) capacitor on the output to improve transient response. In addition to external capacitors, it is good practice to add protection diodes, as shown in *Figure 7* D1 protect the device against input short circuit, while D2 protect against output short circuit for capacitance discharging.

Figure 7. Voltage regulator with protection diodes



Note: D1 protect the device against input short circuit, while D2 protects against output short circuit for capacitors discharging.

9 Revision history

Table 12. Document revision history

Date	Revision	Changes
01-Sep-2004	10	Mistake V_{REF} ==> V_O, tables 1, 4 and 5.
19-Jan-2007	11	D²PAK mechanical data has been updated, add footprint data and the document has been reformatted.
13-Jun-2007	12	Change values ΔI_{ADJ} and V_{REF} test condition of I_O = 10 mA to I_{MAX} ==> I_O = 10 mA to 500 mA on *Table 5*.
23-Nov-2007	13	Added *Table 1*.
06-Feb-2008	14	Added: TO-220 mechanical data *Figure 14 on page 14* and *Table 6 on page 13*.
02-Mar-2010	15	Added: notes *Figure 14 on page 14*, *Figure 15 on page 15*, *Figure 16* and *Figure 17 on page 16*.
17-Nov-2010	16	Modified: R_{thJC} value for TO-220 *Table 3 on page 4*.
18-Nov-2011	17	Added: order code LM317T-DG *Table 1 on page 1*.
13-Feb-2012	18	Added: order code LM217T-DG *Table 1 on page 1*.
12-Mar-2014	19	The part number LM117 has been moved to a separate datasheet. Removed TO-3 package. Updated the description in cover page Modified *Table 1: Device summary*, *Table 3: Thermal data*, *Figure 1: Pin connections (top view)*, *Section 4: Electrical characteristics*, *Section 5: Typical characteristics*, *Section 6: Application information*, *Section 7: Package mechanical data*. Added *Section 8: Packaging mechanical data*. Minor text changes.
