

Aqua Safe 70IB

Application:

- Medium security requirement in severe weather and environmental conditions
- Ideal for securing to vehicles and boats

Operation:

- Key operated
- Automatic locking: locking without key by pushing down the shackle

Technology:

- Lock body made of solid brass
- Encapsulated lock body with special protective cover in front of the lock mechanism to protect against water and dirt
- Impact-resistant plastic sheathing
- Shackle protected by sealed plastic jacket
- Inside parts made of 100% rustproof materials
- Drainage grooves to carry off penetrating water
- Double automatic locking
- Precision 5-pin cylinder with mushroom counter pins
- Paracentric key-way for greater protection against manipulation
