

USB-to-PMBus Interface Dongle for Power Products

[Subscribe](#) Active: In Production.

[Please check latest availability status for a specific part variant.](#)

Overview

Description

The MAXPOWERTOOL002# is an interface adapter between a host PC (IBM™-compatible) and Maxim's PMBus compatible power supply EVKs. The interface to the host PC is a standard type-A to mini-B USB cable. The interface to the EVK is through a 16-pin ribbon cable that carries the PMBus commands.

The MAXPOWERTOOL002# is intended to be used with Maxim's PowerTool GUI and works with the following devices: MAX20751, MAX15301, and MAX15303.
