
Terminal Material Selection Guide

PANDUIT®

infrastructure for a connected world

Comprehensive Wire Terminal Solutions

Panduit offers a broad selection of industry approved styles, sizes, and materials to meet a full range of electrical, industrial, and networking applications

Insulation Descriptions

Non-Insulated – Highest tonnage installation, no short circuit protection

Vinyl – High flammability

Nylon – Halogen free

Fully Insulated Nylon – Halogen free, best when no dielectric barriers are present

Fully Insulated Premium Nylon– High flammability and halogen free, best when no dielectric barriers are present

Heat Shrink – Moisture corrosion protection

KYNAR* – Radiation resistance and corrosion protection

Polypropylene – Low dielectric strength

Connection Type	Product Family	Styles	Wire Range (AWG)	Insulation Material					Base Metal				Plating

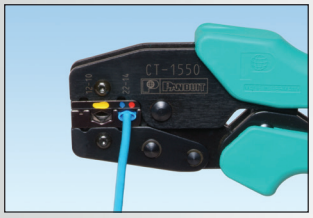
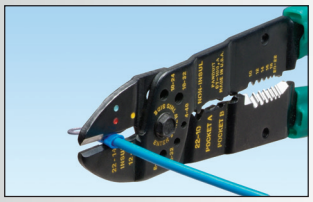
Tools To Complete Your Termination System



Controlled Crimp Cycle Tools – CT-1002, CT-1525, CT-1550, CT-1570

- Controlled cycle mechanism assures high quality, consistent terminations
- Terminal tongue locator controls both the depth and rotation position of connectors into the crimp die to optimize process and provide best performance and quality
- Ergonomic tool design assures operator comfort, safety, and performance
- Cushion handles provide chemical resistance and a cushioned, non-slip grip

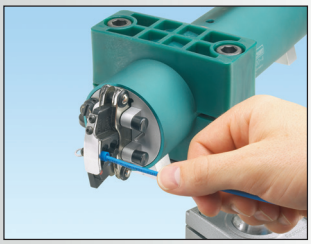


Hand Operated Pliers Type Crimp Tools – CT-100A, CT-200, CT-260

- Installer controlled crimp
- Available with wire stripping and cutting features
- Plier type crimp for #22 – 10 AWG insulated and non-insulated terminal products

Battery Powered Crimp Tools – CT-2500 and CT-2600

- Quick crimping cycle results in less time to crimp terminals
- Compact, portable, and lightweight (less than 4 lbs.) construction allows simple one-hand crimp capability in space constrained areas
- The CT-2500 has interchangeable crimp dies for connectors #22 – 10 AWG
- The CT-2600 has interchangeable crimp dies for connectors #8 – 2 AWG



Pneumatic Crimp Tool – CT-600-A

- Quickly crimps a variety of loose piece terminals in a variety of wire sizes for medium volume production
- Versatile interchangeable crimping heads let you switch terminal types quickly to meet changing production requirements; this tool, when used with only four crimp heads, can crimp a full range of # 26 – 10 AWG insulated and non-insulated terminal products
- Portable – the small size, ease of bench mounting and quick pneumatic connection allow the tool to be moved from one work station to another or to the work itself

Automated Crimp Tools – Presses, and Applicators – UC200 (CP-871), CA9, SCA-712022002 (CA10)

- Provide a superior solution for quality, high volume terminations
- Minimal cycle time and most consistent quality
- Quick exchange of die sets and product loading for minimal setup times
- System leverages industry standard mini applicator mount for seamless compatibility with Automatic Wire Processing (AWP) equipment
