

# PROTO Connect 2 Board

PROTO Connect 2 board provides a convenient way of connecting wires from power supply, communication, analog or GPIO lines to the target breadboard. Board features two screw terminals and two connection pads in standard 100mil distance. Board is compact and cheap thus making it a good choice for prototyping.

## Technical Specifications

### *Key features*

- Micro screw terminals for two wire connection
- Connection pads compatible with standard breadboards.

### *Key Benefits*

- Compact size simplifies integration.
- Affordable price.
