PROTO Connect Board

PROTO Connect board provides a convenient way of connecting eight wires from power supply, communication, analog or GPIO lines to the target breadboard. Board features eight screw terminals and eight connection pads in standard 100mil distance. Board is compact and cheap thus making is a good choice for prototyping.

Technical Specifications

Key features

- Micro screw terminals for eight wire connections
- Connection pads compatible with standard breadboards.

Key Benefits

- Compact size simplifies integration.
- Affordable price.
