

GENERAL DESCRIPTION

The LGE1117 is a series of low dropout three-terminal regulators with a dropout of 1.15V at 1A output current.

The LGE1117 series provides current limiting and thermal shutdown. Its circuit includes a trimmed bandgap reference to assure output voltage accuracy to be within 1%. Current limit is trimmed to ensure specified output Current and controlled short-circuit current. On-chip thermal shutdown provides protection against any combination of overload and ambient temperature that would create excessive junction temperature.

The LGE1117 has an adjustable version, that can provide the output voltage from 1.25V to 12V with only 2 external resistors.

The LGE1117 series is available in the industry standard SOT-223,SOT-89,TO-220,TO-252 and TO-263 power packages.

FEATURES

- Low Dropout Voltage: 1.15V at 1A Output Current
- Trimmed Current Limit
- On-Chip Thermal Shutdown
- Three-Terminal Adjustable or Fixed 1.5V, 1.8V, 2.5V, 3.3V, 5V
- Operation junction Temperature: 0 °C to125°C

APPLICATIONS

- PC Motherboard
- LCD Monitor
- Graphic Card
- DVD-Video player
- NIC/Switch
- Telecom Modem
- ADSL Modem
- Printer and other peripheral Equipment

ADJ: Adjustable Output

1.5: Fixed Output 1.5V

1.8: Fixed Output 1.8V

2.5: Fixed Output 2.5V

3.3: Fixed Output 3.3V

5.0: Fixed Output 5.0V

LGE1117

1A Low Dropout Linear Regulator

ABSOLUTE MAXIMUM RATINGS (NOTE 1)

Parameter	Value	Unit
V _{IN}	20	V
Maximum Junction Temperature	150	°C
Storage Temperature Range	-65 to 150	°C
Lead Temperature (Soldering, 10sec.)	300	°C
ESD (Machine Model)	600	V

Note 1: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

RECOMMENDED OPERATING CONDITIONS

Parameter	Min	Max	Unit
V _{IN}		15	V
Operating Junction Temperature Range	0	125	°C

ELECTRICAL CHARACTERISTICS

 Operating Conditions: $V_{IN} \leq 10V$, $T_J = 25^\circ C$ unless otherwise specified.

Parameter	Conditions	Min	Typ	Max	Unit
Reference Voltage	LGE1117-ADJ $I_{OUT} = 10mA$, $V_{IN} - V_{OUT} = 2V$, $10mA \leq I_{OUT} \leq 1A$, $1.4V \leq V_{IN} - V_{OUT} \leq 8V$, $P \leq$ Maximum power Dissipation	1.238 1.225	1.250 1.250	1.262 1.270	V
