

Free Mount Cylinder Series CU

Double Acting Single Rod/Double Rod
Single Acting Spring Return/Extend, Non-rotating Rod
ø6, ø10, ø16, ø20, ø25, ø32

A space saving air cylinder with multiple surfaces for mounting.
The series consist of an array of cylinders.

Space savings

Having a square shape without a bracket, any of its surfaces can be used for mounting, thus enabling a space saving equipment layout.

Auto switch attachable

Made to Order

Refer to p.5.4-1 for "Made to Order" of series CU.

Cautions

① Operating speed

Make sure to connect a speed controller to the cylinder and adjust its speed to 500mm/s or less.

If a load is to be attached to the end of the rod, adjust the speed to the maximum speed shown in Fig. 1 or less, in accordance with the added mass.

Graph 1: Load weight and max. speed

How to read graph

- Using the CU10 to drive a load weighing 2.5kg: From the vertical axis in the graph on the left, extend the horizontally from 2.5kg., and drop down from the point at which it intersects with the tube bore ø10. The maximum speed will be 141mm/s.

② Rod end allowable lateral load

Make sure that the lateral load that is applied to the rod end will be no more than the values shown in the tables.

The tables show the value for a single rod. For double rods, contact SMC.

Standard/Double acting single rod

		D-F9BAL	2 wire, In-line (2 colour), water resistant	5.3-67

D-9□ auto switches are attachable. Refer to p.5.3-21 and 5.3-22 for further information on D-90, D-90A, D-93A and D-97.

Auto Switch Mounting**D-A9□, F9□, A9□V, F9□**

Flat head watchmakers screw driver

Set screw

- When tightening the auto switch mounting screw, use a watch makers screw driver with a handle about 5 to 6mm in diameter.
- Also tighten to a torque of approximately 0.10 to 0.20Nm.

- Do not use BU-1 (Switch mounting screw for D-9□ auto switch). Auto switch may be damaged.

Auto Switch Groove Position

Bore size (mm)	(mm)	
	A	B
ø 6	8.2	9
ø10	10.3	13
ø16	15	18
ø20	21	23
ø25	27	25
ø32	35	27

Precautions on Proximity Installation

When universal mounting cylinders equipped with D-A9□ or D-F9□ auto switches are used, the auto switches could activate unintentionally if the installed distance is less than the dimensions shown in the table. Therefore, make sure to provide a greater clearance. Due to unavoidable circumstances, if they must be used with less distance than the dimensions given in the table, the cylinders must be shielded. Therefore, affix a steel plate or a magnetic shield plate (MU-S025) to the area on the cylinder that corresponds to the adjacent auto switch. (Contact SMC for details.)

Note 1) Negative figures of the table show dimensions mounted inside cylinder body.

Note 2) In the case of the 5mm stroke or the 10mm stroke, there are times in which the switch will not turn OFF or 2 switches will turn ON simultaneously due to their movement range. Therefore, set the position approximately 1 to 4mm outward from the values given in the table above. Then, perform an operation inspection to make sure that the switches operate normally (if 1 switch is used, make sure that it turns ON and OFF properly; if 2 switches are used, make sure that both switches turn ON).

Note 3) Figures in () are for D-A93.

Precautions

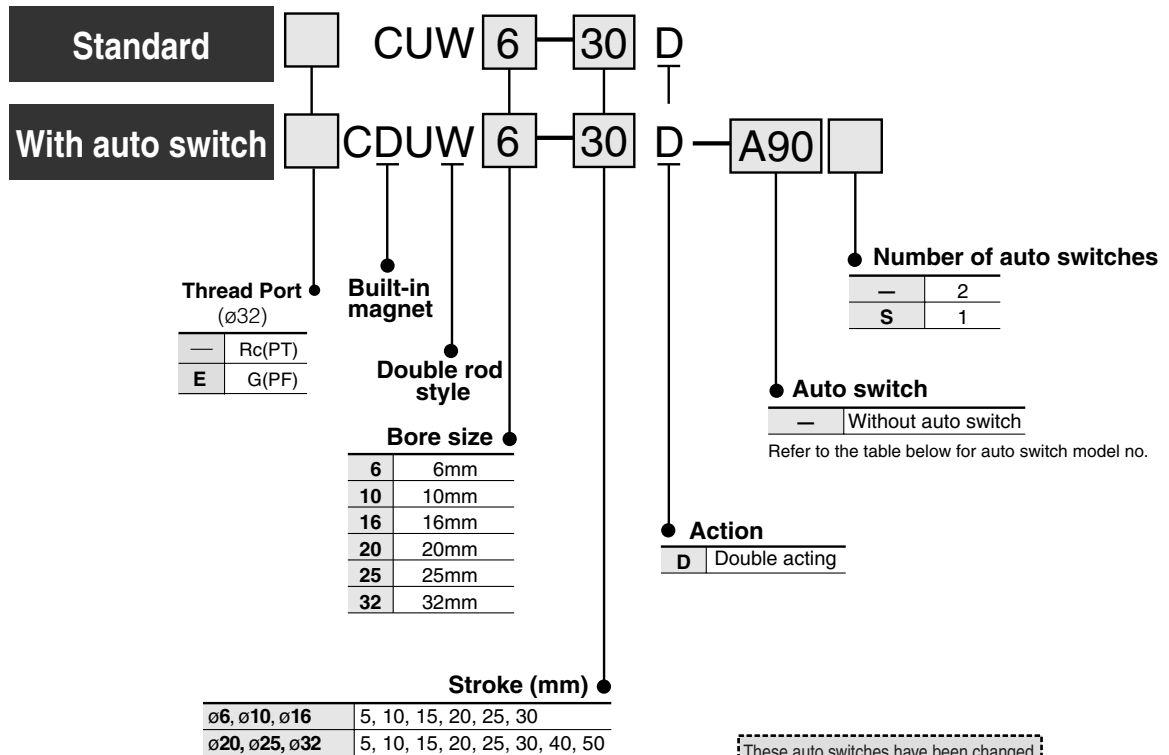

Be sure to read before handling. Refer to p.0-44 to 0-46 for common precautions of auto switch.

Note 1) Negative figures of the table show dimensions mounted inside cylinder body.

Note 2) In the case of the 5mm stroke or the 10mm stroke, there are times in which the switch will not turn OFF or 2 switches will turn ON simultaneously due to their movement range. Therefore, set the position approximately 1 to 4mm outward from the values given in the table above. Then, perform an operation inspection to make sure that the switches operate normally (if 1 switch is used, make sure that it turns ON and OFF properly; if 2 switches are used, make sure that both switches turn ON).

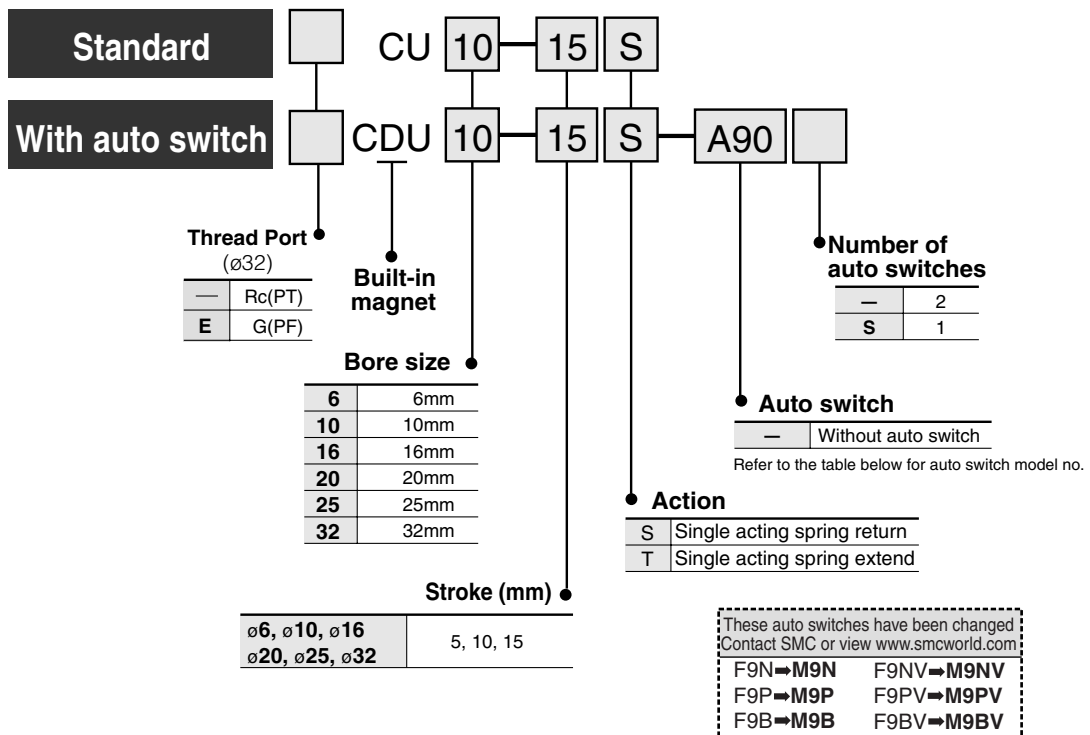

Note 3) Figures in () are for D-A93.

Double acting/Single rod

Order Made Made to Order

Refer to p.5.4-1 for made to order specification of CUK series.

⚠ Precautions

Be sure to read before handling.
Refer to p.0-39 to 0-46 for Safety Instructions and common precautions.

Cautions on Use

⚠ Caution

- Do not place your fingers in the clearance between the non-rotating plate and the cylinder tube.

Your fingers could get caught between the non-rotating plate and the cylinder tube when the piston rod retracts. Therefore, never place your finger in this area.

Because the cylinder outputs a great force, it could lead to injury if precautions are not taken to prevent your fingers from getting caught.

- When using the non-rotating style, make sure that rotational torque is not applied to the piston rod. If rotational torque must be applied due to unavoidable circumstances, make sure to use it at the allowable rotational torque or less, which is shown in the table on the right.

Specifications

Bore size (mm)	ø6	ø10	ø16	ø20	ø25	ø32
Fluid	Air					
Proof pressure	1.05MPa

Refer to p.5.3-75 for auto switch weight.

Auto Switch Mounting Position

Refer to p.2.1-21 for auto switch mounting position of CUKW series. The specifications are same as double acting double rod style.

Theoretical Force

Refer to p.2.1-18. The specifications are same as double acting double rod style (CUW series).

Tightening Torque

Refer to p.2.1-11 for mounting of CUKW series.

Allowable Rotating Torque

Make sure that rotational torque is not applied to the piston rod of the CUKW series cylinder. If rotational torque must be applied due to unavoidable circumstances, refer to p.2.1-32.

Refer to p.5.3-75 for auto switch weight.

Made to Order

Refer to p.5.4-1 for Made to Order specifications.

Precautions

Be sure to read before handling.
Refer to p.0-39 to 0-46 for
Safety Instructions and common
precautions.

Tightening Torque

Refer to p.2.1-11 for mounting of CUK series single acting style.

Theoretical Force

Refer to p.2.1-23. Specifications are same as single acting/spring return and extend style (CU series).

Auto Switch Mounting Position

Refer to p.2.1-28 and 2.1-29. Auto switch mounting position of single acting: spring return and extend style of CDUK series is same as single acting: standard spring return and extend styles.

Allowable Tightening Torque

Make sure that rotational torque is not applied to the piston rod of the CUK series single acting type cylinder. If rotational torque must be applied due to unavoidable circumstances, refer to p.2.1-32.

⚠ Precautions

Be sure to read before handling. Refer to p.0-39 to 0-46 for Safety Instructions and common precautions.

Auto Switch Mounting Position

Refer to p.2.1-21 for mounting position of CDU long stroke series. Specifications are same as standard double acting single rod style.

Tightening Torque

Refer to p.2.1-11 for mounting of long stroke style.

Theoretical Force

Refer to p.2.1-12. Specifications are same as CU series double acting single rod style.

Construction

ø6

With auto switch

ø10

ø16 to ø32

Component Parts

No.	Description	Material	Note
①	Cylinder tube	Aluminum alloy	Hard anodized
②	Rod cover	Aluminum bearing alloy	Hard anodized
③	Head cover	Brass	ø6 to ø10, nickel plated
		Aluminum alloy	ø16 to ø32, White chromated
④	Piston	Brass	ø6 to ø10
		Aluminum alloy	ø16 to ø32, Chromated
⑤	Piston rod	Stainless steel	
⑥	Bumper A	Urethane	
⑦	Bumper B	Urethane	

No.	Description	Material	Note
⑧	Snap ring	Carbon tool steel	Phosphate coating
⑨	Rod end nut	Carbon steel	Nickel plated
⑩	Magnet holder	Brass	ø6
⑪	Magnet	Magnet material	
⑫	Auto switch	—	
⑬	Piston gasket	NBR	
⑭	Piston seal		
⑮	Rod seal		
⑯	Gasket		

Replacement Parts: Seal Kits

Bore size (mm)	Kit No.	Contents
ø10	CU10D-PS	Kits include items ⑭, ⑮ and ⑯ from the table above
ø16	CU16D-PS	
ø20	CU20D-PS	
ø25	CU25D-PS	
ø32	CU32D-PS	

 Seal kits consist of items ⑭, ⑮ and ⑯ contained in one kit, and can be ordered using the order number for each respective tube bore size.

Specifications

Bore size (mm)	ø6	ø10	ø16	ø20	ø25	ø32
Fluid	Air					
Proof pressure	1.05MPa					
Max. operating pressure	0.7MPa					
Min. operating pressure	0.15MPa	0.10MPa	0.08MPa			
Ambient and fluid temperature	Without auto switch: -10°C to -70°C With auto switch : -10°C to -60°C (No freezing)					
Lubrication	Not required (Non-lube)					
Operating piston speed	50 to 500mm/s					
Cushion	Rubber bumper					
Rod end thread	Male thread					
Thread tolerance	JIS class 2					
Stroke tolerance	+10 0 mm					
Non-rotating accuracy (1)	±0.8°			±0.5°		

Note 1) No load: at rod retracted

Standard Stroke

Bore size (mm)	Standard stroke (mm)
ø6, ø10, ø16	40, 50, 60
ø20, ø25, ø32	60, 70, 80, 90, 100

Weight/(): With D-A90

⚠ Precautions

Be sure to read before handling.
Refer to p.0-39 to 0-46 for Safety
Instructions and common precautions.

Allowable Rotating Torque

Make sure that rotational torque is not applied to the piston rod of long stroke style cylinder. If rotational torque must be applied due to unavoidable circumstances, refer to p.2.1-32.

Tightening Torque

Refer to p.2.1-11 for mounting of CUK series.

Theoretical Force

Refer to p.2.1-12. Specifications are same as CU double acting single rod style.

Auto Switch Mounting Position

Refer to p.2.1-16 for auto switch mounting position of CDUK long stroke. Specifications are same as standard single acting double rod style.
