## absolute maximum ratings over operating free-air temperature range (unless otherwise noted)<sup>†</sup>

Supply voltage, V <sub>CC</sub> (see Note 1) .....	7 V
Input voltage, V <sub>I</sub> : '04, 'S04 'LS04 .....	5.5 V
Package thermal impedance, θ <sub>JA</sub> (see Note 2): D package DB package N package NS package .....	86°C/W 96°C/W 80°C/W 76°C/W
Storage temperature range, T <sub>stg</sub> .....	-65°C to 150°C

<sup>†</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. This are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- NOTES: 1. Voltage values are with respect to network ground terminal.  
2. The package thermal impedance is calculated in accordance with JESD 51-7.
