## Low Profile Datacom/Telecom Applications

The N-Series is a full-featured hydraulic-magnetic circuit breaker packaged in an innovative low profile design to meet the smaller size requirements of datacom/telecom power distribution units and rack systems. Its features include easy access line and load terminals with UL 489 compliant sliding terminal barriers, an optional current transformer capable of sensing current down to a level of 1%, and a patented flush rocker actuator with push-to-reset guard to protect against inadvertent actuation. The N-Series is available as a one or two pole configuration with ratings from 1 to 30 amps, up to 277VAC for one pole or 120/240VAC for two poles with a max IC of 22,000 amps.

# Tech Specs

## Electrical

**Dielectric Strength** UL, CSA-1960V 50/60 Hz for one minute between all electrically isolated terminals. Comply with the 8mm spacing and 3750V 50/60 Hz dielectric requirements from hazardous voltage to operator accessible surfaces and between main circuits of adjacent poles per Publications EN 60950 and VDE 0805

**Current Ratings** Integrated current transformer. Measurement range: 1-30 Amps. Voltage output: 10mV per Amp according to the formula below:  
 $2(\text{Amp}) \leq I \leq 30(\text{Amp})$   
 $V = 0.01 \times I \pm 2\%$   
 (with current metering codes 1 or 2)  
 $V = 0.01 \times I \pm 1\%$   
 (with current metering codes 3 or 4)

$$\left| \frac{\frac{V}{I} - \frac{V_{10}}{I_{10}}}{\frac{V_{10}}{I_{10}}} \right| \leq 0.85\%$$

Where V=CT output in volts  
 $V_{10}$ =CT output in volts with  $I=I_{10}=10$  (A);  $I$ =primary current in amperage (50/60 Hz). Phase shift between primary current and CT output is  $0.25 \pm 0.25^\circ$ . Maximum crest factor of primary current is 1.73. R1 shall be integrated in the breaker. R2 and R3 are provided by end user and external to the breaker. Connection: below Load Terminal. 2-pin connector, Molex® 35362-0250. Mating Connector housing – Molex® PN35507-0200.  
 (Current metering is available on AC rated devices only)

Note: When current metering code is 1 or 2; Y to equal 1.0  
 When current metering code is 3 or 4; Y to equal 0.1
