Product Change Notification  
Dear Customer,

We are transitioning our legacy Cooper Bussmann branded products to Eaton Bussmann series.

This transition takes immediate effect for the attached BS88 low voltage fuse catalog numbers.

This change will be seen on both the product and carton labels. Below are pictures to illustrate how this change will look on product and carton labels of the catalog numbers in the attached list.

Please note that these changes do not impact the ordering process or the form, fit or function our products.

Any inventory of these fuses is still saleable product and should not be returned.

For further information on this product end of life please contact your local Bussmann series products sales representative.

Sincerely,

Kevin Calzada

Product Manager
