## **AD-SWIO 2 Click**

PID: MIKROE-3861

**AD-SWIO 2 Click** is a quad-channel software configurable input/output solution based on AD74413R, for building and process control application. The AD74413R is a quad-channel software configurable input/output solution for building and process control applications. The device provides a fully integrated single chip solution for input and output operation. The AD-SWIO 2 Click contains four 13-bit DACs, one per chanal, and 16-bit  $\Sigma$ - $\Delta$  ADC. These options give a lot of flexibility in choosing functionality for analog output, analog input, digital input, resistance temperature detector (RTD), and thermocouple measurements integrated into a single chip solution with a serial peripheral interface (SPI).

The AD-SWIO 2 Click is supported by a mikroSDK compliant library, which includes functions that simplify software development. This Click board  $^{\text{TM}}$  comes as a fully tested product, ready to be used on a system equipped with the mikroBUS  $^{\text{TM}}$  socket.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

## **Specifications**

Туре	ADC-DAC,SWIO
Applications	Its a perfect choice for Process control, Factory automation, Motor drives, Building control systems.
On-board modules	AD74413R a quad-channel ADC-DAC converter; ADR4525BRZ a high precision low noise voltage reference and ADP1613 step-up dc-to-dc switching converter all from Analog Devices
Key Features	Optimized for 16-bit ADC (Analog-to-Digital Converter) and 13-bit DAC (Digital-to-Analog Converter).
Interface	GPIO,SPI
Compatibility	mikroBUS
Click board size	L (57.15 x 25.4 mm)
Input Voltage	3.3V,5V
