# **Round Water-resistant Connectors (M12)**

### **Water-resistant Smartclick Connectors That Reduce Installation Work**

- New IDC Field-wiring versions of the XS5G and XS5C.
- A newly developed lock structure that maintains compatibility with screw-type M12 connectors.
- Simply insert the Connectors, then turn them approximately 1/8 of a turn to lock.
- A positive click indicates locking.
- Features the same degree of protection (IP67) as conventional, screw-type M12 connectors.
- · Connector with cable are UL approved

### **■** Specifications

Rated current	4 A
Rated voltage	250 VDC
Contact resistance (connector)	40 m $\Omega$ max. (20 mV max., 100 mA max.)
Insulation resistance	1,000 MΩ min. (at 500 VDC)
Dielectric strength (connector)	1,500 VAC for 1 min. (leakage current: 1 mA max.)
Degree of protection	IP67 (IEC60529)
Insertion tolerance	50 times min.
Lock strength	Tensile: 100 N/15 s, Torsion: 1 N·m/15 s
Cable holding strength	Tensile: 100 N/15 s, Torsion: 1 N·m/15 s (for cable diameter of 6 mm) (See note 2)
Lock operating force	0.1 N·m to 0.25 N·m
Ambient operating temperature range	-25°C to 70°C
Number of pressure-weld repairs (See note 1)	10 times max. (Limited to the same external diameter and wire diameter.)

Note: 1. Only XS5C/G (IDC models)

2. Refer to product specifications for details.

### ■ Recommended Cables

Cablo	utor diamo	Core sizes				
Cable outer diame- ter (mm)		Crimping models	Soldering models	Screw-on models	IDC Models	
8 mm	7 to 8 mm				0.14 to 0.75 mm <sup>2</sup>	
7 mm	6 to 8 mm	_	_		Minimum Wine Diameters 0.00mm	
6 mm	5 to 6 mm	Two types of connectors		0.18 to 0.75mm <sup>2</sup>	Minimum Wire Diameter: 0.08mm Outer diameter of wire covering: 0.7 to 2.6 mm	
4 mm	4 to 5 mm	are available: 0.18 to 0.3mm <sup>2</sup>	0.5 mm <sup>2</sup> max.		Sheath material: PVC, PE, PUR	
3 mm	3 to 4 mm	0.5 to 0.75mm <sup>2</sup>			Material of wire covering: PVC, PE

### **Precautions**

Note: 1. See "XS5/XS2 - Assembly Tooling and Accessories" datasheet for information and precautions regarding assembly, tooling and accessories that are common to the XS5 and XS2 connectors, along with assembly details for the NEW IDC Field-wiring versions of the XS5C and XS5G connectors.

2. See "XS2" datasheet for specifics regarding those connectors

### ■ Correct Use

Do not use the Connectors in an atmosphere or environment that exceeds the specifications.

#### **Connector Connection and Disconnection**

- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand.
- Do not hold the cable when disconnecting Connectors.
- When mating Connectors, be sure to insert the plug all the way to the back of the socket before attempting to lock the Connectors
- Do not use tools of any sort to mate the Connectors. Always use your hands. Pliers or other tools may damage the Connectors.
- When mating the Connectors to XS2 or other M12 Connectors. tighten the lock by hand to a torque of 0.39 to 0.49 N·m.

#### Wiring

- · Always confirm wiring diagrams before wiring sensors, limit switches, or other devices.
- · Lay the cables so that external force is not applied to the Connectors. Otherwise, the degree of protection (IP67) may not be achieved.

#### **Degree of Protection**

- The degree of protection of Connectors (IP67) is not for a fully watertight structure. Do not the Connectors underwater.
- Do not step on or place any objects on the Connectors. Doing so may damage the Connectors.

### ■ General Precautions

- Do not pull excessively on the Connectors or cables. Do not install the Connectors or cables in any way that would place a load directly on the mating section or cable connections. Doing so can damage the Connectors or break the wires inside the cables.
- Install the Connectors and cables where they will not be stepped on to prevent the wires inside the cables from being broken and to prevent the Connectors from being damaged. If the Connectors or cables must be installed where they might be stepped on, protect them with covers.
- · Refer to the specifications for your cables before bending the cables and do not bend them past their minimum bending radius.
- · If sensors or switches are not attached during installation, protect the mating surface of the Connector with a XS2Z-22 Waterproof Cover of XS2Z-14/15 Dust Cover.

### **■** Connecting the XS5

#### 1. Connecting the XS5 Plug and Socket

 Align the projection on the plug cover with the polarity key on the socket, then insert the plug all the way in.

• Hold the knurled socket grip, then insert the projection on the plug into the groove of the socket.

• Turn the knurled grips of the socket clockwise approximately 45 degrees in respect to the plug. A click will indicate that the Connectors are locked. The locking condition can also be confirmed by the alignment marks on the plug and socket.

### 2. Connecting the XS5 and XS2

- Align the projection on the plug cover with the polarity key on the socket, then insert the plug all the way in.
- In the same way as when connecting two XS2 Connectors, screw the knurled grip in the clockwise direction.
- Use your fingers to tighten the Connectors sufficiently.
