

CL615 Model

**CODELOCK
600
MECHANICAL**

Codelocks CL615

The CL615 is a heavy duty tubular mortice latch with Code Free entry option.

The outside lever handle will retract the latch after a correct code is entered. The spring loaded latchbolt will lock automatically when the door is closed.

Quick Code change!

The CL600 range incorporating the new Quick Code system allows on door code change in seconds. Typically most mechanical digital locks require the lock to be removed from the door or partly disassembled to change the code. Code Free access option on the keypad. In Code Free mode the outside lever will retract the latchbolt without using a code. This option is ideal for day to day

use when punching in a code is not necessary e.g. external doors in a school with high traffic.

- Internal doors and External doors
- Quick Code change - no need to remove lock from door
- Mechanical Codelock
- Code Free access option
- Lever handle lock for doors hung on the left or right
- Available in Brushed Steel and Polished Brass
- Use in offices / schools / warehouses / hospitals / care homes / nurseries / hotels / leisure facilities / the home

Available in 2 PVD Finishes Brushed Steel, Polished Brass

CL615 brushed steel lock available with either lever or knob handle

The CL615 locks are supplied with a random code commencing with the 'C' clear button. The code is non sequential, that is the code can be entered in any order e.g. 1234 can be 4321 or 1342 or whatever is the most convenient sequence. With the 12 buttons a total of 4,095 different codes are available, any of which may be entered in any order. The CL615 has been designed so that the code can be changed on the door in seconds.
