## **MLCC Medical Applications – MM Series**

### **General Specifications**

The MM series is a multi-layer ceramic capacitor designed for use in medical applications other than implantable/life support. These components have the design & change control expected for medical devices and also offer enhanced LAT including reliability testing and 100% inspection.

### **APPLICATIONS**

### Implantable, Non-Life Supporting Medical Devices

· e.g. implanted temporary cardiac monitor, insulin pumps

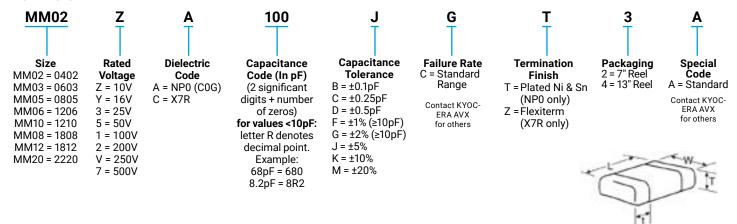

### **External, Life Supporting Medical Devices**

· e.g. heart pump external controller

### **External Devices**

· e.g. patient monitoring, diagnostic equipment

### **HOW TO ORDER**

### **COMMERCIAL VS MM SERIES PROCESS COMPARISON**

	Commercial	MM Series
Administrative	Standard part numbers; no restriction on who purchases these parts	Specific series part number, used to control supply of product
Lot Qualification Destructive Physical Analysis (DPA)	As per EIA RS469	Increased sample plan – stricter criteria
Visual/Cosmetic Quality	Standard process and inspection	100% inspection
Application Robustness	Standard sampling for accelerated wave solder on X7R dielectrics	Increased sampling for accelerated wave solder on X7R and NP0 followed by lot by lot reliability testing
Design/Change Control	Required to inform customer of changes in: form fit function	KYOCERA AVX will qualify and notify customers before making any change to the following materials or processes:  Dielectric formulation, type, or supplier Metal formulation, type, or supplier Termination material formulation, type, or supplier Manufacturing equipment type Quality testing regime including sample size and accept/reject criteria
