Transparent 12 mm Hot Melt Glue Slug

RS Stock number [315-2839](#)

Description:

The TEC Bond 232 is an aggressive general purpose hot melt glue stick used in many applications ranging from hobby & craft projects to gap filling and product assembly. The TEC Bond 232 has a high viscosity, medium open time

Medium setting hot melt general purpose adhesive in distinctive colours to improve visual appearance, can be used for tamper proofing, batch traceability and coding.

Ideal for use as a gap filler

Suitable for use on porous substrates

All constituent parts of these adhesive sticks have been approved by the American FDA under the following section: CFR21, 175-105, 176-180

Specifications:

Colour:	Transparent
Diameter:	12 mm
Gap Filling:	Yes
Material Compatibility:	Card, Expanded Polystyrene, Ceramic, Glass, Paper, PUR Foam
Maximum Application Temperature:	200 °C
Minimum Application Temperature:	160 °C
Open Time:	15 s
Product Form:	Stick
