

## MICRO SWITCH ${ }^{\text {™ }}$ SX Series <br> Premium Subminiature Basic Switches

The industry-defining name in snap-action switches, Honeywell MICRO SWITCH ${ }^{\text {TM }}$ premium subminiature switches are designed for repeatability and enhanced product life. The MICRO SWITCH ${ }^{\top M}$ SX Series delivers consistent performance within a range of conditions.

Offering enhanced repeatability, the MICRO SWITCH ${ }^{\text {TM }}$ SX Series' lower operating force provides for application versatility. Like the MICRO SWITCH ${ }^{\text {TM }}$ SM Series, the SX Series (which is a smaller package) offers gold contacts for low energy switching and bifurcated gold contacts for maximum reliability. Bifurcated contacts provide parallel redundancy within the SX switch.

## What makes our switches better?

- Industry-leading life cycle rating reduces the need to replace switches over life in an OEM platform - reducing total system cost
- Very wide temperature range allows for years of reliable performance in the harshest of conditions
- MIL-PRF-8805 qualified listings
- Operating forces as low as 0,147 N [15 g] and differential travel as low as 0,025 mm [0.001 in] delivers consistent precise switch characteristics

## LONG LIFE

With a mechanical life of up to $\mathbf{1 0 , 0 0 0}, \mathbf{0 0 0}$ operations, SX Series switches boast an industry-leading life cycle.

## APPLICATION FLEXIBILITY

MICRO SWITCH ${ }^{\text {TM }}$ SX Series delivers a selection of actuation, electrical termination, and operating characteristics along with high-temperature construction options.

## Life of up to 10,000,000 cycles

## INDUSTRY-LEADING TEMERATURE RANGE

With a wide temperature range of $-54^{\circ} \mathrm{C}$ to $204^{\circ} \mathrm{C}\left[-65^{\circ} \mathrm{F}\right.$ to $\left.400{ }^{\circ} \mathrm{F}\right]$, SX Series switches allow for years of reliable performance in harsh conditions.

## Precision switch characteristics

## COMPACT AND ROBUST

Built from military-grade components, MICRO SWITCH ${ }^{\text {TM }}$ SX switches deliver MIL-PRF-8805 qualified listings in a lightweight, subminiature package. SX switches are available with FAA-PMA approvals for commercial aircraft applications.

## EASILY CONTROLS LOW-VOLTAGE DC APPLICATIONS

Switches available with a choice of silver, gold-plated, or bifurcated gold contacts to handle a variety of electrical load requirements.

## GLOBAL APPROVALS

UL/CSA, cUL, ENEC, and CE approvals allows the customer to utilize switches in products sold across the globe - in some of the most regulated regions.

## Potential Applications

## AEROSPACE

- In precision switch assemblies for commercial aircraft to monitor doors for "closed" and "locked" position
- Monitor whether landing gear is "up" or "down and locked"
- In precision switch assemblies for commercial cockpit applications for pushbuttons, toggle, or joystick assemblies
- MIL-PRF-8805 listings suitable for precision switch assemblies in military applications
- FAA-PMA approvals for commercial aircraft

## INDUSTRIAL

- In precision switch assemblies for pressure switches and temperature switches
- In power generation, fuel level switch for gas and oil

## NUMERIC DESIGNATIONS FOR MICRO SWITCH™ SX SERIES/ORDER GUIDE

| Prefix | Description |
| :---: | :---: |
| 1SX | Plastic pin plunger, fine silver contacts with 0.188 mounting hole centers |
| 2SX | 1SX with low force characteristics (3 oz. max. operating force) |
| 3SX | 1SX with gold/gold alloy contacts |
| 4SX | 1SX with high temperature construction [ $400{ }^{\circ} \mathrm{F}$ ] |
| 6SX | 1SX with high temperature and gold/gold alloy contacts |
| 7SX | 2SX with gold/gold alloy contacts |
| 11SX | Low force characteristics (OF and DT) |
| 12SX | 11SX with bifurcated gold contacts |
| 13SX | 11SX with gold/gold alloy contacts |
| 14SX | 11SX with high temperature construction |
| 21SX | 1SX with MIL-approvals |
| 22SX | 2SX with MIL-approvals |
| 23SX | 1SX with gold/gold alloy contacts and MIL-approvals |
| 311SX | 11SX with integral lever actuator |
| 312SX | 12SX with integral lever actuator |
| 313SX | 13SX with integral lever actuator |

** Switch is mounted with plunger end reversed from JX-40
NOTE: Above actuators should be used below $149^{\circ} \mathrm{C}$ [ $300{ }^{\circ} \mathrm{F}$ ], except listings JX-95, JX-96, JX-219, and JX-220 are for use with 4SX1-T to $204{ }^{\circ} \mathrm{C}\left[400{ }^{\circ} \mathrm{F}\right]$
$\Delta$ Measurement for leaf-style levers is from center of mounting hole nearest tip of lever to the point indicated on the drawing
$* * *$ Measurement for hinge-style levers is from pivot point of the lever
to the end of the lever or center of the lever's roller

Failure to comply with these instructions could result in death or serious injury.

## WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While we provide application assistance personally, through our literature and the Honeywell website, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.
