LFCG-2500+

 50Ω DC to 2500 MHz

The Big Deal

- Very good rejection, 50 dB typical
- Rugged, ceramic construction
- Tiny size, 0.079" x 0.049" x 0.037" (0805)
- Excellent power handling, 4.5W

Product Overview

Mini-Circuits' LFCG-2500+ is an LTCC low pass filter with a passband from DC to 2500 MHz, supporting a variety of applications. This model provides 1.2 dB typical passband insertion loss and provides a very good stopband rejection due to strategically constructed layout with minimal interaction between components. It handles up to 4.5W RF input power and provides a wide operating temperature range from -55 to +125°C. Housed in a tiny 0805 ceramic form factor with wraparound terminations, the filter is ideal for dense PCB layouts and with minimal performance variation due to parasitics.

Kev Features

Feature	Advantages			
Ultra-wide stopband	The LTCC lowpass filter provides a very good stopband rejection until 10 GHz suitable for high end applications.			
LTCC Construction	Provides repeatable performance in a rugged, ceramic package well suited for tough environments such as high humidity and temperature extremes.			
Tiny size (0.079" x 0.049" x 0.037")	Saves space in dense circuit board layouts and minimizes the effects of parasitics.			
High power handling, 4.5W	Supports a wide range of system power requirements.			
Wrap-around terminations	Provides excellent solderability and easy visual inspection

Storage Temperature	-55°C to 125°C					
RF Power Input*	4.5 W max.@25°C					

*Passband rating, derate linearly to 1W at 125°C ambient Permanent damage may occur if any of these limits are exceeded

LTCC construction **Applications**

Features

Harmonic Rejection

• Temperature stable

- VHF/UHF transmitters / receivers
- · Military radar applications

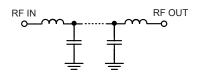

· Low loss, 1.2 dB typical

· High rejection 50 dB typical

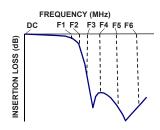

· Excellent power handling, 4.5W

- Test and measurement
- · Telecommunications & broadband wireless applications
