Desoldering Braids Flyer

400-LF SERIES - LEAD FREE SUPER WICK

The 400-LF series Lead Free Super Wick are high quality, precision cleaned desoldering braids that were produced with up-to-date and environmentally friendly processes and technology. The high-purity copper conducts heat fast, allowing for faster wicking and shorter dwell time that minimizes possible overheating damages.

Features

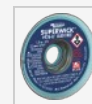

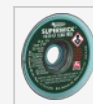

- Conforms to MIL-F-14256E RMA flux and J-STD-004
- High purity, oxide-free copper
- ESD (Electrostatic Dissipative) safe for 1.5 m [5 ft] bobbins
- Environmentally and PCB safe residues
- Suitable for Use in Food Facilities as a Non-Food Chemical - Canadian and NFS recognition letters available on request

Applications

- Printed circuit board rework
- Benchtop repair and service
- Surface mount assemblies touch up
