

Specification Sheet

Part Number: TAG10L-105

Laser printable self-laminating polyester has a smooth surface, allowing for the highest resolution and print contrast.

The material is 1.0 mil thick, allowing it to conform around wires and cable.

The acrylic-based adhesive bonds to a wide variety of substrates and can withstand high temperatures long term.

Lasertags are not affected by the high heat required in a laser printer.

Product Description HellermannTyton's self-laminating labels are used for marking wires and cable. The clear tail overlaps and protects the printed information from abrasion, chemicals and solvents and resists UV exposure. When printed using a laser printer, clear marking and high high-contrast imaging against the wire make this the perfect choice for durable identification.
