

STANLEY

STANLEY FATMAX® Torx TT25 x 100mm Screwdriver

1-65-397

Features:

- Chrome vanadium steel bar allows for high torque
- Soft grip handle design offers a perfect grip and reduction in fatigue
- Large diameter handle offers great torque needed for driving wood screws
- Handle moulded direct to bar virtually unbreakable bond
- Colour coded ends provide easier identification of screwdriver type

Description:

The STANLEY FATMAX® Torx TT25 x 100mm Screwdriver has been constructed using chrome vanadium steel, which allows for high torque and reduces the chances of tip breakage. The soft grip handle design offers a perfect grip and reduction in fatigue during application. The handle design has been moulded to the bar creating a virtually unbreakable bond that is highly reliable, enhancing the tool life. The smooth domed colour coded end offers a fast spinning action and easier identification for selecting the correct screwdriver for the correct application.
