CU202 USB 2.0 Extension Cable, Beige

【Product Picture】

【Product Description】

Model	
CU202	
Cable Length	
1.5m, 1.8m, 3m, 5m	
Interface	
Input: USB A Male Output: USB A Female	
Version	
USB2.0, up to 480 Mbps	
Material	
Shell Material	Beige PVC molding
Connector Material	Nickel-plated

【Features】

- USB extension cable extends the USB 2.0 connection between a computer or tablet to USB peripherals like a hub, mouse, or flash drive; the cable connects the existing cable of your device to the female port on the extension cable.
- The USB cable extender reduces plugging and unplugging from your computer USB port.
- Plug & Play: no software or drivers required.
- High-quality connectors, bare copper conductors, and foil & braid shielding to provide superior USB cable extension performance and error-free data transmission.
- Data transfer rate is limited to 480 Mbps, This cable cannot be used for charging (Because with the extension length of cable, the voltage attenuates)

【Application】

USB 2.0 extension cable no need to squeeze yourself to the back of the TV or desktop to connect usb disk or other usb peripherals, as Webcam, Printer, Scanner, USB Camera, Game Controller, and more and more.
