

Compile Your Own Evaluation Kit with Sensirion's Toolbox

Each SEK-Environmental Sensing evaluation kit can be compiled individually in just three steps: Order a Sensirion [SEK-SensorBridge](#), choose your environmental sensor and download our [SEK-ControlCenter viewer software](#) to start measuring.

Please find here an overview of the new SEK-Environmental Sensing toolbox: [PDF \(view on mobile phone\)](#)

1. Buy a SEK-SensorBridge

The SEK-SensorBridge allows you to connect suitable Sensirion sensors to a computer. It works hand-in-hand with the [SEK-ControlCenter software](#). There are two ports on the [SEK-SensorBridge](#), allowing you to connect sensors. You can connect more than one sensor to each port, provided that the sensors have different I²C addresses.

- **Important:** For evaluating particulate matter sensors (SEK-SPS30), VOC sensors (SEK-SVM40) and formaldehyde sensors (SEK-SFA30) no SEK-SensorBridge is needed

	<p>SEK-SensorBridge</p> <p>Product page</p>	<ul style="list-style-type: none"> ▪ Connect two sensors to one SEK-SensorBridge and evaluate simultaneously ▪ 1.2V – 5.5V selectable supply ▪ Power supply up to 250mA @ 5V 	<p>Includes</p> <ul style="list-style-type: none"> ▪ 1x SensorBridge ▪ 1x USB connector cable 	<p>Buy now</p>
---	--	---	---	--------------------------------

2. Choose Your SEK-Evaluation-Sensors

Each SEK-Evaluation-Sensors comes with the required connector cable. Evaluation sensors are available for all Sensirion environmental sensors.

Humidity and Temperature Sensors +

Gas Sensors +

Carbon Dioxide (CO2) Sensors +

Particulate Matter Sensors +

Formaldehyd Sensor Module -

	<p>SEK-SFA30</p> <p>Product page</p> <p>Datasheet coming soon</p> <p>Important: No SEK-SensorBridge needed</p>	<ul style="list-style-type: none"> ▪ Reliable Formaldehyde measurements in real life conditions ▪ Excellent long-term stability and 6 years service lifetime ▪ On-board RH and T compensation, additional RH and T output 	<p>Includes</p> <ul style="list-style-type: none"> ▪ 1x SFA30 ▪ 1x UART to USB Adapter Cable (2 meter length) ▪ 1x Jumper Wire Set 	<p>soon available</p>
---	--	--	---	-----------------------

3. Download the SEK-ControlCenter Viewer Software

The **SEK-ControlCenter** viewer software makes it possible to display and log the sensor signals for multiple sensors connected to several **SEK-SensorBridges** on the same PC.

- Download our SEK-ControlCenter viewer software at: www.sensirion.com/controlcenter
-
