

HDC-701EL Video Capture Card Solution

The HDC-701EL video capture card supports full HD video compression using H.264 technology. It offers one-channel HDMI/DP/DVI-I/YPbPr input and one-channel HDMI bypass output. It supports multiple input types, and allows one-channel encode, PiP screen encode from two video sources, OSD screen encode, and cropping video for later encode. User can preview the video from HDMI bypass output during editing or encoding video.

Multiple input types supported by HDC-701EL:

- HDMI interface
- DP interface
- DVI-I interface
- VGA interface
- YPbPr interface which supports sync on green

Video Scaler Functions

- It can convert a signal from a lower resolution to a higher resolution without affecting the video quality.
- It can convert a non-standard resolution (such as 1280*960) to the resolution supported by the HDC-701EL.

◆ Picture in Picture (PiP) Function

The video sources from two interfaces can be displayed on the same screen simultaneously and the PiP screen can be encoded by the HDC-701EL.

◆ OSD (on-screen display)

Information such as date, resolution etc. and the video source can be displayed on the same screen simultaneously and the OSD screen can be encoded by the HDC-701EL.

◆ Cropping

Cuts the outer part of an image in order to improve the composition, emphasize the subject or change the ratio.

Applications

◆ PIP Application

Video Input Source
(choose two different interfaces from the five)

Computer Monitor with HDC-701EL

1. Can display two different sources together.
2. Allows you to adjust where to put the small video.
3. Can display two videos and record the videos at the same time.

Monitor

The raw data from two different signals can be displayed at the same time.

◆ OSD Application

Healthcare Solution

Video Input Source
(choose one interface from the five)

With the OSD function, for example, the date, time, operating room's number and doctor's name can be displayed on the monitor when using in a surgery room. The surgery with the OSD information can be recorded by using the HDC-701EL capture card and the file can be saved for future reference. The scenario described above is just one of many possible scenarios in which the HDC-701EL is used to capture video with OSD information. In addition to that, IEI is capable to customize the OSD information to be displayed for other applications based on customer's needs.

HDC-701EL

PCI Express Video/Audio Capture Card with One Channel HDMI/DP/DVI-I/ YPbPr Input and One Channel HDMI Output, 1920x1080@30p, and H.264 Hardware Encoder

Features

- 1-channel HDMI/DP/DVI-I/YPbPr input with H.264 hardware compression and 1-channel HDMI output
- High quality video recording up to 1080p30
- HDMI output supports video preview up to 1080p60, so you can watch video while recording or editing
- Provides DirectShow filter
- Equipped with video scaler for PIP, OSD, cropping (optional)
- Windows/Linux OS supported
