Features

- 2:1 and 3:1 Wide Input Voltage Ranges
- Regulated
- 1kVDC, 2kVDC and3kVDC Isolation UL94V-0 Package Material
- **Continuous Short Circuit Protection**

Converters

- Low Ripple and Noise
- **Remote On/Off Control**
- Efficiency to 83%

Description

Very high power density, 2:1 or 3:1 input voltage range and a wide operating temperature range -40°C to +71°C and extra features such as On/Off control are just some of the characteristics of this converter which is ideal for highly sophisticated industrial designs. The RS3 is available with 2kV or 3kV isolation options (1kVDC is standard)

No suffix is standard isolation (1kVDC) e.g, RS3-0505S

*add suffix /H2 or /H3 for 2kVDC or 3kVDC isolation, e.g, RS3-0505S/H2, R3S-0505DZ/H3

Note: To protect the converter under all fault conditions, an input fuse is required. Quick-blow fuses should be rated at 2x-3x the normal input current, time-delay fuses at 1.5x the normal input current.

Notes	
Note 1:	Maximum capacitive load is defined as the capacitive load that will allow start up in under 1 second without damage to the converter
Note 2:	The RS3 series requires a minimum of 10% load on the output to maintain specified regulation. Operating under no-load conditions
	will not damage these devices; however, they may not meet all listed specifications.

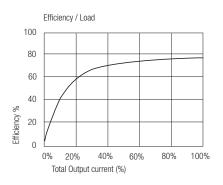

ECONOLINE

DC/DC-Converter

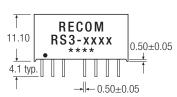

Typical Characteristics

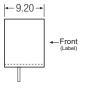

RS3-S_D/(Z) Series

RS3-0505S

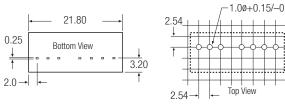

Package Style and Pinning (mm)

Recommended Footprint Details

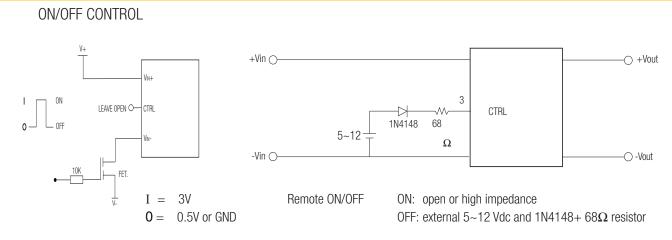

Pin 8 (NC*) This pin is used internally and must have no external connection.

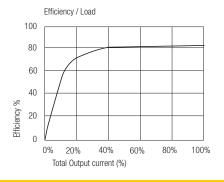

Pin 3 (CTRL)

This pin provides an Off function which puts the converter into a low power mode. When the pin is 'high' the converter is OFF and when the pin is high 'Z' the converter is ON. There is no allowed low state for this pin.

Application Examples

The product information and specifications are subject to change without prior notice. RECOM products are not authorized for use in safety-critical applications (such as life support) without RECOM's explicit written consent. A safety-critical application is defined as an application where a failure of a RECOM product may reasonably be expected to endanger or cause loss of life, inflict bodily harm or damage property. The buyer shall indemnify and hold harmless RECOM, its affiliated companies and its representatives against any damage claims in connection with the unauthorized use of RECOM products in such safety-critical applications.
