INSTRUCTION MANUAL

TCD210070AC

Autonics

Thank you for choosing our Autonics product.

Read and understand the instruction manual and manual thoroughly before using the product.

For your safety, read and follow the below safety considerations before using. For your safety, read and follow the considerations written in the instruction manual, other manuals and Autonics website.

Keep this instruction manual in a place where you can find easily.

The specifications, dimensions, etc. are subject to change without notice for product improvement. Some models may be discontinued without notice.

Follow Autonics website for the latest information.

Safety Considerations

- Observe all 'Safety Considerations' for safe and proper operation to avoid hazards.
- A symbol indicates caution due to special circumstances in which hazards may occur.

★ Warning Failure to follow instructions may result in serious injury or death.

- 01. Fail-safe device must be installed when using the unit with machinery that may cause serious injury or substantial economic loss. (e.g. nuclear power control, medical equipment, ships, vehicles, railways, aircraft, combustion apparatus, safety equipment, crime/disaster prevention devices, etc.)
 Failure to follow this instruction may result in personal injury, economic loss or fire.
- 02. Do not use the unit in the place where flammable/explosive/corrosive gas, high humidity, direct sunlight, radiant heat, vibration, impact or salinity may be
- ilure to follow this instruction may result in explosion or fire. 03. Use the unit within the rated specifications.
- ure to follow this instruction may result in fire or shortening the life cycle of the product.
- 04. Do not connect, repair, or inspect the unit while connected to a power source.
- 05. Check 'Cautions during Power Wiring' and 'I/O Wiring' before wiring.
- Failure to follow this instruction may result in fire.

 O6. In preparation for product damage, communication error, or malfunction, install external emergency stop circuit, forward/reverse interlock circuit, limit switch,
- **emergency stop switch, or other protection circuit.**Failure to follow this instruction may result in personal injury, economic loss or fire.
- 07. Since Lithium battery is embedded in the product, do not disassemble or burn the
- Failure to follow this instruction may result in fire 08. Do not disassemble or modify the unit.
- 09. Please contact to us for battery replacement

Using an unauthentic battery may result in fire or product damage.

- ⚠ Caution Failure to follow instructions may result in injury or product damage.
- 01. Use a dry cloth to clean the unit, and do not use water or organic solvent.
- 02. When connecting the power input, use AWG 23 cable or over, and tighten the terminal screw with a tightening torque of 0.5 to 0.8 N·m.
- 03. Keep the product away from metal chip, dust, and wire residue which flow into the
- Failure to follow this instruction may result in fire or product damage
- 04. Do not touch the front LCD screen over 2 points at the same time.
- 05. Do not put any heavy object on the front screen.
- n may result in malfunction due to deformation of LCD and touch panel.

Cautions during Use

- Follow instructions in 'Cautions during Use'. Otherwise, It may cause unexpected accidents.
- Power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Install a power switch or circuit breaker in the easily accessible place for supplying or disconnecting the power.
- Operate the product after supplying power to the product, input/output equipment, and
- load. If operate product before supplying power, it may result in output error or malfunction
- · Keep away from high voltage lines or power lines to prevent inductive noise. Do not use near the equipment which generates strong magnetic force or high frequency
- Make a required space around the unit for radiation of heat, and do not block ventilation
- openings.

 Do not push the touch panel with a hard and sharp object or push the panel with excessive force. It may result in fire or malfunction

- When skin is smeared with liquid crystal from the broken LCD, rinse with running water for over 15 minutes. If it gets into the eyes, rinse eyes with running water for over 15 minutes and contact a doctor.
- When changing the battery, contact Autonics service center to change it.
- Using unauthentic battery may result in fire or product damage.

 This unit may be used in the following environments.
- Indoors (in the environment condition rated in 'Specifications')
- Altitude max. 2,000m
- Pollution degree 2 - Installation category II

Product Components

- Logic panel + built in battery
- Sold separately: communication cable
- 7.0 inch: 4 fixing brackets
- 10.4 inch: 6 fixing brackets, CAN connector

Visit Autonics web site to download software and manuals.

atDesigner

atDesigner is a dedicated screen editor software used to create, edit, and monitor the screen data of LP/GP-A devices. All data arrangement, layout, shapes, properties can be edited using at Designer. The screen data, project admin account, security level, language, and script can all.

atLogic

atLogic is for create, edit, and debug programs for LP series logic panels.

■ Firmware

Please refer to 'LP-A Series user manual' for firmware upgrade

Manuals

For the detailed information and instructions, please refer to the manuals, and be sure to follow cautions written in the technical descriptions. Visit Autonics website to download manuals

■ LP-A Series user manual

It describes general information about installation and system of GP-A Series.

■ atDesigner user manual

It describes how to design user screen and how to use HMI function.

atLogic user manual, atLogic programming manual

■ GP/LP user manual for communication

It describes how to connect with external devices such as PLC.

Cautions during Power Wiring

- Do not apply power before power line connection.
- · Check power polarity.
- \bullet For power supply, use the wire of which cross section is at least 0.75 mm^2 and use the wire of which cross section is at least 1.25 mm² for grounding.
- Use ring crimp terminal with at least 3 mm of internal diameter and less than 6 mm of external diameter.
- Tighten the terminal screw with 0.5 to 0.8 N \cdot m torque.
- Ground resistance should be less than 100 Ω and ground it separately.

Installation

1. Set the product in panel. (panel thickness: \leq 4mm) When installing the product on panel, make 100 mm of space from upper, lower, right, left side of the product, on panel and back side of panel. It is for preventing effect of electromagnetic waves and heat from other controllers. [Image 1]

2. Set fixing brackets in the fixing bracket mounting slots. [Image 2]

3. Tighten the fixing bracket with M4 Screw driver and tightening torque is 0.5 to 0.6N·m. [Image 1] [Image 2]
