## Power Resistor Thick Film Technology

## FEATURES

- 100 W at $25^{\circ} \mathrm{C}$ case temperature heatsink mounted
- Direct mounting ceramic on heatsink
- Broad resistance range: $0.015 \Omega$ to $1 \mathrm{M} \Omega$
- Non inductive
- TO-247 package: compact and easy to mount
- AEC-Q200 qualified
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

LTO series are the extension of RTO types. We used the direct ceramic mounting design (no metal tab) of our RCH power resistors applied to semiconductor packages.

## DIMENSIONS in millimeters

Note

- Tolerances unless stated: $\pm 0.3 \mathrm{~mm}$

## STANDARD ELECTRICAL SPECIFICATIONS

| Resistance Values | $\geq 0.015$ | $\geq 0.1$ | $>20$ |
| Tolerances | $\pm 900 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ | $\pm 1 \%$ at $\pm 10 \%$ |  |
| Typical Temperature Coefficient <br> $\left(-55^{\circ}\right.$ to $\left.+175{ }^{\circ} \mathrm{C}\right)$ | $\pm 350 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ | $\pm 200 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |  |

## CHOICE OF THE HEATSINK

The user must choose according to the working conditions of the component (power, room temperature).
Maximum working temperature must not exceed $175^{\circ} \mathrm{C}$. The dissipated power is simply calculated by the following ratio:

$$
P={\frac{\Delta T}{\left[R_{T H(j-c)}\right]+\left[R_{T H(c-h)}\right]+\left[R_{T H(h-a)}\right]}}^{\text {(1) }}
$$

P: $\quad$ Expressed in W
$\Delta \mathrm{T}$ : Difference between maximum working temperature and room temperature
$\mathrm{R}_{\mathrm{TH}(\mathrm{j}-\mathrm{c})}$ : Thermal resistance value measured between resistive layer and outer side of the resistor. It is the thermal resistance of the component.
 of the interface (grease, thermal pad), and the quality of the fastening device.
$\mathrm{R}_{\text {TH }(\mathrm{h}-\mathrm{a}) \text { : } \text { : }}$ Thermal resistance of the heatsink.

## Example:

$\mathrm{R}_{T H(c-h)}+\mathrm{R}_{T H(h-a)}$ for LTO 100 power rating 10 W at ambient temperature $+25^{\circ} \mathrm{C}$
Thermal resistance $\mathrm{R}_{\mathrm{TH}(\mathrm{j}}$ - c): $: 1.5^{\circ} \mathrm{C} / \mathrm{W}$
Considering equation ${ }^{(1)}$ we have:

$$
\begin{aligned}
& \Delta \mathrm{T}=175^{\circ} \mathrm{C}-25^{\circ} \mathrm{C}=150^{\circ} \mathrm{C} \\
& R_{\text {TH }(j-c)}+R_{\text {TH }(\mathrm{c}-\mathrm{h})}+\mathrm{R}_{\text {TH }(\mathrm{h}-\mathrm{a})}=\frac{\Delta \mathrm{T}}{\mathrm{P}}=\frac{150}{10}=15^{\circ} \mathrm{C} / \mathrm{W} \\
& R_{\text {TH }(\mathrm{c}-\mathrm{h})}+\mathrm{R}_{\text {TH }(\mathrm{h}-\mathrm{a})}=15^{\circ} \mathrm{C} / \mathrm{W}-1.5^{\circ} \mathrm{C} / \mathrm{W}=13.5^{\circ} \mathrm{C} / \mathrm{W}
\end{aligned}
$$

with a thermal grease $\mathrm{R}_{T H}(\mathrm{c}-\mathrm{h})=1^{\circ} \mathrm{C} / \mathrm{W}$, we need a heatsink with $\mathrm{R}_{\mathrm{TH}(\mathrm{h}-\mathrm{a})}=12.5^{\circ} \mathrm{C} / \mathrm{W}$.

## POWER RATING

The temperature of the case should be maintained within the limits specified.
To improve the thermal conductivity, surfaces in contact should be coated with a silicone grease and the torque applied on the screw for tightening should be around 1 Nm .

## OVERLOADS

In any case the applied voltage must be lower than the maximum overload voltage of 750 V . The values indicated on the graph below are applicable to resistors in air or mounted onto a heatsink.

## ENERGY CURVE

POWER CURVE

IMPEDANCE CURVE $10 \Omega$ to $1 \mathrm{k} \Omega$ from 100 kHz to 300 MHz

## PACKAGING

Tube of 30 units

## MARKING

Model, style, resistance value (in $\Omega$ ), tolerance (in \%), manufacturing date, Vishay Sfernice trademark.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
