

Type 3502 Series

Key Features

2W@70°C in 2010 size package

Suitable for auto placement

Available from distribution

Terminal finish matte sn over ni barrier

TE Connectivity is pleased to introduce this thick film high power device, sister to our popular 3522 series, suitable for auto placement in volume and for most applications. Supplied as standard on 7 inch Reels of 2000 pieces per reel.

Characteristics – Electrical

Power Rating @ 70°C	2W	
Resistance Range	1Ω ~ 10ΜΩ	
Resistance Tolerance	±1%, ±5%	
Temperature Coefficient of Resistance	1Ω~10Ω ≤± 200PPM/°C	
(TCR)	10.1Ω~10MΩ ≤± 100PPM/°C	
Max. Working Voltage	200V	
Max. Overload Voltage	500V	
Dielectric Withstanding Voltage	500V	
Operating Temperature Range	-55°C ~ 155°C	

Resistors shall have a rated direct-current (DC) continuous working voltage or a approximate sine-wave root-mean-square (RMS) alternating-current (AC) continuous working voltage at commercial line frequency and waveform corresponding to the power rating, as determined from the following formula:

 $RCWV = VP \times R$

Where the calculated RCWV is greater than the stated Max. Working Voltage, the Max. Working Voltage will apply.

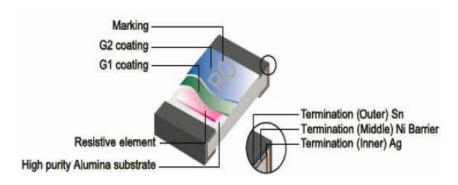

Power Rating and Derating

Resistors shall have a power rating based on continuous load operation at an ambient temperature of 70 $^{\circ}\text{C}$. For temperature in excess of 70 $^{\circ}\text{C}$, The load shall derate as shown in chart below.

Construction and Dimensions:

Tuno		D	imensions (mn	n)	
Type	L	W	Н	£ 1	€2
3502	5.00 ± 0.10	2.50 ± 0.15	1.10 ± 0.10	0.60 ± 0.25	0.50 ± 0.20

	± (1.0% + 0.05Ω) Max.	Y/X = 3/90 mm for 60 seconds

Marking

A. 4 digit marking for E-96 series:

*The first 3 digits are significant figures of resistance and the 4th digit denoted number of zeros.

Ex. **1273** 127ΚΩ

*For ohmic values below 100 Ω , letter "R" is for decimal point.

Ex. **49R9** 49.9Ω

B. 3 digit marking for E-24 series:

*The first 2 digits are significant figures of resistance and the 3rd digit denoted number of zeros

Ex. **124** 120KΩ

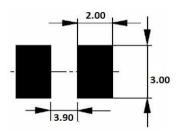

*For ohmic values below 10 Ω , letter "R" is for decimal point

Ex. 4.7Ω

Soldering

PCB Plan (mm)

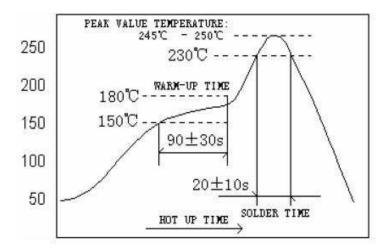

- 4 layers PCB specification:
- 1) Outside 2 layers (Top and Bottom) with copper foil thickness at 2oz.
- 2) Inside 2 layers (Middle layers) with copper foil thickness at 4 oz.

Environment Related Substance

This product complies to EU RoHS directive, EU PAHs directive, EU PFOS directive and Halogen free.

Storage Condition

The performance of these products, including the solderability, is guaranteed for a year from the date of arrival at your company, provided that they remain packed as they were when delivered and stored at a temperature of $25^{\circ}\text{C} \pm 10^{\circ}\text{C}$ and a relative humidity of $60\%\text{RH} \pm 10\%\text{RH}$, chemical and dust free atmosphere.

Even within the above guarantee periods, do not store these products in the following conditions:

1. In salty air or in air with a high concentration of corrosive gas, such as Cl2, H2S, NH3, SO2, or NO2 $\,$

2. In direct sunlight

How To Order
