Innovative Design

The YP series resistors are coated with multilayer silicone to give an excellent protection to the resistance wire at temperatures from -55°C to 350°C. The terminals are designed for quick and easy mounting on capacitors and have a mounting pitch of 22 and 31.8 mm.

These are wirewound ceramic core resistors designed for voltage balancing of series connected aluminium electrolytic capacitors. These resistors are also suitable for capacitor voltage discharge safety applications in high voltage circuits. Ideally suited for industrial grade capacitors.

### Derating Curve

The Derating Curve specifies the maximum allowable power at a particular ambient temperature while ensuring that the maximum surface temperature remains within the designated limit.

### Dimensions

Type	Dimension				
	A ±1mm	B max.	C ±1mm	D ±1mm	E ±1mm
YP8	22	40	15	21	9.5
YP10	31.8	50	15	21	9.5

### Application Notes

Where the resistor is subject to a pulse load, please ensure that the average power dissipated remains below the rated power specified.

Resistor performance with pulse loads should be fully application tested prior to use.
