

## VDR Metal Oxide Varistors Standard

### ADDITIONAL RESOURCES

3D Models

Design Tools

Models

QUICK REFERENCE DATA		
PARAMETER	VALUE	UNIT
Maximum continuous voltage in operating temperature range:		
RMS	14 to 680	V
DC	18 to 895	V
Maximum non-repetitive transient current $I_{NRP}$ (8 x 20 $\mu$ s)	100 to 6500	A
Maximum energy (10/1000 $\mu$ s)	0.5 to 496	J
Detailed specification	Based on IEC 61051-1 IEC 61051-2 IEC 61051-2-2	
Storage temperature	-40 to +125	°C
Operating temperature	-40 to +85	°C

### ORDERING INFORMATION

The varistors are available in a number of packaging options:

- Bulk
- On tape and reel
- On tape in ammpack (fanfold)

The basic ordering code for each option is given in tables titled Varistors on Tape on Reel, Varistors on Tape in Ammpack and Varistors in Bulk. To complete the catalog number and to determine the required operating parameters, see Electrical Data and Ordering Information table.

#### Note

- Special lead-configuration as inside or outside crimped leads on request

### AGENCY APPROVALS

- cUL certificate
- ULus certificate
- VDE certificate

#### Note

- Agency approval documents, please see:  
[www.vishay.com/varistors/list/product-29081/tab/documents/](http://www.vishay.com/varistors/list/product-29081/tab/documents/)

### FEATURES

- Low  $\beta$  high purity zinc oxide disc
- Halogen free insulating epoxy coating
- Straight leads and kinked leads
- Straight leads with flange (VDRS05 and VDRS07 only)
- Certified for operation up to 85 °C according to UL 1449 edition 4, VDE/IEC 61051-1/2
- Material categorization:  
for definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

**RoHS**  
COMPLIANT  
HALOGEN  
**FREE**

### APPLICATION

- Overvoltage and transient voltage protection

### DESCRIPTION

The varistors consist of a disc of low- $\beta$  ZnO ceramic material with two solid copper leads (S20 types only) or copper clad steel wire. The wires have a matte tin plating. They are coated with UL 94 V-0 approved ochre colored halogen-free epoxy, which provides electrical, mechanical and climatic protection.

### MOUNTING

The varistors are suitable for hand-mounting (bulk) or automatic pick and place mounting (tape on reel or fanfold). The parts can be soldered by hand or wave soldering. Pin-in-paste reflow soldering is not recommended. Bending of the leads for different angle placement is not recommended.

#### Typical soldering

235 °C, duration: 5 s (Pb-bearing)

245 °C, duration: 5 s (lead (Pb)-free)

#### Resistance to soldering heat

260 °C, duration: 10 s max.

### MARKING

The varistors are marked with the following information:

- Maximum continuous RMS voltage
- Series numbers
  - 592 for VDRS05
  - 593 for VDRS07
  - 594 for VDRS10
  - 595 for VDRS14
  - 596 for VDRS20
- Safety marks on VDRS10-14-20 types
- Manufacturers logo
- Date of manufacture (YYWW)

### INFLAMMABILITY

The varistors are passive non-flammable.

The encapsulation is made of flammable resistant epoxy in accordance with UL 94 V-0.

ELECTRICAL DATA AND ORDERING INFORMATION

Table with columns: MAXIMUM CONTINUOUS VOLTAGE (RMS, DC), VOLTAGE AT 1 mA, MAXIMUM VOLTAGE AT STATED CURRENT (V, I), MAXIMUM ENERGY (10 x 1000 µs) (J), MAXIMUM NON-REP. TRANSIENT CURRENT (I\_NRP) (A), NOMINAL DISCHARGE CURRENT (I\_N) (kA), TYPICAL CAPACITANCE AT 1 kHz (pF), T (max.) (mm), E (mm), SAP MATERIAL AND ORDERING NUMBER (xy).

Notes

- (1) The products are certified according to cULus (E332800), and VDE/IEC (40002622). See Agency Approval section for certificate download
(2) The sinusoidal voltage is assumed as the normal operating condition. If a non-sinusoidal voltage is present, type selection should be based on multiplying the peak voltage by a factor of 0.707.
(3) The voltage measured at 1 mA meets the requirements of IEC 61051. The tolerance on the voltage at 1 mA is ± 10 %.
(4) High energy surges are generally of longer duration. The maximum energy for one pulse of 10 x 1000 µs is given as a reference for longer duration pulses. This pulse can be characterized by peak current (I\_p) and pulse width t\_2 (virtual time of half I\_p value, following IEC 60060-2, section 6). If V\_p is the clamping voltage corresponding to I\_p, the energy absorbed in the varistor is determined by the formula:
E = K x V\_p x I\_p x t\_2
where K is dependent on the value of t\_2 when the value of t\_1 is between 8 µs and 10 µs (see Peak Current as a Function of Pulse Width drawing)
(5) A current wave of 8 x 20 µs is used as a standard for pulse current and clamping voltage ratings. The maximum non-repetitive transient current is given for one pulse applied during the life of the component.
(6) For composition of the SAP part number:
Replace "x" by B for bulk type, T for tape and reel, A for tape and ammpack
Replace "y" by S for straight leads, F for straight leads with flange (bulk only), G for straight leads with flange and H\_0 = 16 mm (tape and reel/ammo), H for straight leads with flange and H\_0 = 18.25 mm (tape and reel/ammo), K for kinked leads (bulk only), L for kinked leads with H\_0 = 16 mm (tape and reel/ammo), M for kinked leads with H\_0 = 18.25 mm (tape and reel/ammo)
(7) All varistors are UL 1449 edition 4 recognized as SPD type 5 (component level) for operating temperatures up to 85 °C. The varistors may be used in other SPD types as 2, 3, or 4 depending on the indicated I\_N nominal discharge current ratings. The final acceptance of the component is dependent upon its installation and use in complete equipment submitted to underwriters laboratories Inc.

**ELECTRICAL CHARACTERISTICS**

ELECTRICAL DATA		
PARAMETER	VALUE	UNIT
Maximum continuous voltage:		
RMS	14 to 680	V
DC	18 to 895	V
Maximum non-repetitive transient current ( $I_{NRP}$ ) (8 x 20 $\mu$ s)		
VDRS05	100 or 400	A
VDRS07	250 or 1200	A
VDRS10	500 or 2500	A
VDRS14	1000 or 4500	A
VDRS20	2000 or 6500	A
Thermal resistance:		
VDRS05	$\approx$ 80	K/W
VDRS07	$\approx$ 70	K/W
VDRS10	$\approx$ 60	K/W
VDRS14	$\approx$ 50	K/W
VDRS20	$\approx$ 40	K/W
Maximum dissipation:		
VDRS05	100	mW
VDRS07	250	mW
VDRS10	400	mW
VDRS14	600	mW
VDRS20	1000	mW
Temperature coefficient of voltage at 1 mA maximum	$\pm$ 0.05	%/K
Voltage proof between interconnected leads and case	2500	V <sub>AC</sub>
Storage temperature	-40 to +125	$^{\circ}$ C
Operating temperature	-40 to +85	$^{\circ}$ C

**DERATING CURVE**

Maximum Voltage  
Maximum Dissipation  
Maximum Energy  
Maximum Transient Current

**PEAK CURRENT AS A FUNCTION OF PULSE WIDTH**

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
