

VARIO 3D Measuring and Marking Angle

Foldable project helper for measurements on flat surfaces and three-dimensional workpieces

Properties

- VARIO 3D Measuring and Marking Angle for measuring and marking three-dimensional workpieces like squared timber and pipes as well as flat surfaces
- folding mechanism for use at various angles – ideal for transferring measurements to two sides of a workpiece
- marking gauge function for parallel score lines
- stops for 45° and 90° angles, and a scale for any angle from 0° to 180°, for controlled aligning and marking
- universal millimetre scale for measuring applications
- compass function for drawing circles with a radius of up to 80 mm on a flat surface
- high-quality plastic design „Made in Europe“ for durability
