

8.9" 1920x1200 IPS Touch Display

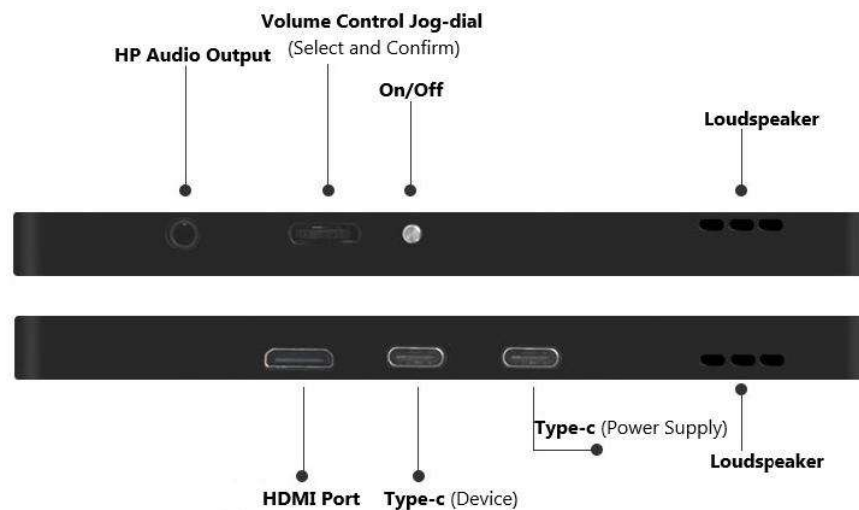

SKU:DFR0658

INTRODUCTION

This 8.9" 1920x1200 IPS Touch Display is most suitable for Jetson Nano and Raspberry Pi 4B/3B+. It features a small size, plug and play, and 10 touching points, providing a smooth and sensitive touching experience for you. The product comes with left and right loudspeakers that offer high-quality stereo to bring you the perfect user experience.

With 1920*1200 resolution, you can always enjoy high-definition images when developing your projects. What's more, the HDR technology enhances the contrast between light and dark and further improves the color saturation.

IPS panel is adopted for greatly improving the color displaying ability, especially, it ensures more accurate color balance, hue, and saturation to present realistic colorful images; With a viewing angle of 178°, you can enjoy high-definition picture almost at every angle.
