## Spirit Level

RS Stock number [603-930](#)

### Description:

Levels manufactured from fine iron castings with a involute 'V' groove between the bearing flats for accurate seating on round work. Ground glass main and cross test vials. The 310mm version in addition has a plumb vial fitted. The main vial is adjustable to positive setting and marked with graduations, 2.5mm apart, to BS3509 sensitivity. A bubble movement of 2.5mm (1 graduation) indicates a tilt from the horizontal of 0.12mm per 300mm.

The main vial has a sensitivity of 1 minute and is protected by a rotating shroud. Each level is fitted with a main, cross and plumb vial and the vial solution maintains its colour and fluidity under all workshop conditions.

### Specifications:

Frame Material: Cast Iron

Length: 310 mm

Width: 36 mm

Height: 58 mm
