Dual N & P-Channel PowerTrench® MOSFET

General Description

These dual N- and P-Channel enhancement mode power field effect transistors are produced using Fairchild Semiconductor's advanced PowerTrench process that has been especially tailored to minimize on-state ressitance and yet maintain superior switching performance.

These devices are well suited for low voltage and battery powered applications where low in-line power loss and fast switching are required.

Features

• Q1: N-Channel

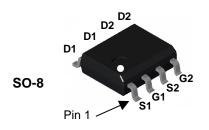

7.0A, 30V
$$R_{DS(on)} = 0.028\Omega$$
 @ $V_{GS} = 10V$ $R_{DS(on)} = 0.040\Omega$ @ $V_{GS} = 4.5V$

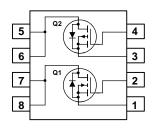

Q2: P-Channel

-5A, -30V
$$R_{DS(on)} = 0.052\Omega @ V_{GS} = -10V$$

$$R_{DS(on)} = 0.080\Omega @ V_{GS} = -4.5V$$

- Fast switching speed
- High power and handling capability in a widely used surface mount package

Absolute Maximum Ratings T_A = 25°C unless otherwise noted

Notes:

^{1.} R_{8JA} is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins. R_{8JC} is guaranteed by design while R_{8CA} is determined by the user's board design.

SOIC-8 Tape and Reel Data

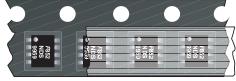

Packaging	Description

Packaging Description:

SOIC-8 parts are shipped in tape. The carrier tape is made from a dissipative (carbon filled) polycarbonate resin. The cover tape is a multilayer film (Heat Activated Adhesive in nature) primarily composed of polyester film, adhesive layer, sealant, and anti-static sprayed agent. These reeled parts in standard option are shipped with 2,500 units per 13° or 330cm diameter reel. The reels are dark blue in color and is made of polystyrene plastic (anti-static coated). Other option comes in 500 units per 7° or 177cm diameter reel. This and some other options are further described in the Packaging Information table.

These full reels are individually barcode labeled and placed inside a standard intermediate box (illustrated in figure 1.0) made of recyclable corrugated brown paper. One box contains two reels maximum. And these boxes are placed inside a barcode labeled shipping box which comes in different sizes depending on the number of parts shipped.
