

NAIL PULLER

For opening packing cases, timber reclamation, removing floor boards and general carpentry you can't find a better Nail Puller.

For easy removal of almost every type of nail even if sunk below the surface, simply sink the jaws in around the nail using the integral slide hammer. The heat treated alloy steel jaws act in the same way as a pair of pincers whilst the long handle gives excellent leverage.

Position the Nail Puller over the nail to be removed

Use the integral slide hammer to drive the jaws under the nail head

Lever the tool on to its curved foot to close the jaws in a firm grip

Simple and effortless removal of nails

19" (485mm)

Integral slide hammer

1.6kg weight
