

Eao Series 61 Keylock switches and Selectors

Keylocks

RS Part Numbers

331-4914

331-4936

331-4936

Are key locksthat can be mounted into a round 16mm hole.

Each key switch has a metal barrel on which the user snaps on a plastic hood.

The hood is either round square or rectangular and this is supplied within the RS part number

Keylock Switch

Set of 3 keylock hoods

Once the user snaps on the keylock hood they have a switch suitable for mounting in a 16mm cut-out. With a front shape of either 18mm round , 18mm square or 18 x 24 mm rectangular. The key switches would stick up around 8mm from the panel

Should the customer need to mount the switches in the flush mount configuration then he will need to buy the flush bezel set for keylocks

331-4964 Flush bezel set keylocks

This includes three flush mount bezels,

Round Bezel

This goes into a 22.5mm hole into which the user fits the keylocks above with which he has snapped on the round hood

Square Bezel

This goes into a 21 by 21mm hole into which the user fits the keyswitch above with which he has snapped on the square hood

Rectangular Bezel

This goes into a 21 by 27mm hole into which the user fits the keyswitch above with which he has snapped on the rectangular hood

Flush keyswitch bezel set 331-4964

Selector Switch

The selector switch

331-4942 has a round front shape

The selector can be mounted into a 16mm round hole.

If the user want to flush mount the selector then they can buy a flush selector bezel set.
