

SparkFun Inventor's Kit Add-On Pack - v4.0

KIT-14310

DESCRIPTION

INCLUDES

DOCUMENTS

With this Add-On Pack you will be able to incorporate some of the older parts that used to be included in the SparkFun Inventor's Kit but were removed with v4.0 — as well as a few items that are still included but that you may need more of! Included in this kit you will find jumper wires, tactile buttons, NPN transistors, a DC gearmotor, a small breadboard, flex sensors and a few other parts. A full breakdown of all the parts in this kit can be found in the "Includes" tab.

This is the perfect kit if you've completed everything to do with the SIK v4.0 but are looking for more — or if you'd like to make the components of the v4.0 match an earlier SIK.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
