## Amphenol ICC

# **OCTIS<sup>™</sup> Outdoor I/O System**

#### Right angle board connector, cable connector kit and cable assembly

## ROBUST I/O FOR HIGH RELIABILITY AND PERFORMANCE

The versatile OCTIS<sup>™</sup> I/O system, using multiple industry standard interfaces, features high speed signal and power, lightning protection, EMI shielding, and ease of installation for outdoor, compact and harsh environments.

- Blind mate, float mount, color and physical coding features makes it easy to use and avoids mismating.
- Field termination or factory certified cable assembly options are available.
- Use of standard small form factor interfaces enable greater port to port density. This makes it ideal for outdoor applications like small cells, macro cells, smart radios and RRU/RRH.
- OCTIS<sup>™</sup> I/O system is suitable for various applications with standard connector interfaces like SFP/SFP+, QSFP, Signal, PoE (Power over Ethernet), MDR26, Power, Hybrid of Signal & Power and RJ45.

# 

#### **FEATURES**

- Outdoor weather proof
- Rugged design
- Multi standard and varying interconnection interface
- Adaptable interface holder and outer housing
- Color coding on gland nuts
- System addresses present and future signal and power requirements with option for additional connector interfaces
- 26mm pitch and <100m length from panel</p>
- Double locking feature

#### **BENEFITS**

- Suitable for most demanding environments. Lightning protection up to 20K A
- 100 mating cycles, 200N tensile load; suitable for sophisticated equipment used in modern telecom and industrial markets
- Suitable for various applications with standard connector interfaces like SFP/SFP+, QSFP, Signal, PoE (Power over Ethernet), MDR26, Power, Hybrid of Signal & Power and RJ45.
- Cable mounting, mating and locking remain the same regardless of interface used
- Visual identification of cable assembly type
- Upgrade option to higher data rate up to 10G & 25G per lane bandwidth and 35A+ per contact
- High density and small form factor
- Tamper proof

OCTIS<sup>™</sup> is a trademark of Radiall. OCTIS<sup>™</sup> is a joint product development between Amphenol and Radiall.

#### **D** OCTIS<sup>™</sup> Outdoor I/O System

#### **FIBER OPTICS**

OCTIS<sup>™</sup> offers a range of optical solutions meeting ever increasing bandwidth requirements. SFP version is interoperable with all types of SFP/SFP+ ports and suitable for high data rate applications over long lengths. QSFP version offers enhanced bandwidth (4X SFP/SFP+). In standard OCTIS<sup>™</sup> product, transceiver moves outside the box saving significant board space and providing better thermal management. Solutions are also offered for applications in which transceiver is located inside radio with suitable adapters (duplex LC, MPO etc).
