# **CT310**

## XtremeSense® 2D TMR Angular Sensor

#### **Features**

- Angular Error less than 0.30° (After Compensation)
   Over Full Temperature Range
- Dual Full-Bridge Resistor Network
- Operating Magnetic Field: 25 mT to 90 mT
- Differential Outputs for SIN and COS Axes
- Supply Voltage: 1.0 V to 5.5 V
- AEC-Q100 Grade 1 (Under Qualification)
- Package Options:
  - 8-lead TSSOP
  - $\circ$  8-lead DFN,  $2.00 \times 2.00 \times 0.45$  mm
  - o KGD (Known Good Die) in Wafer Form

#### **Applications**

- Angular Measurements
- Rotary and Angular Sensors
- BLDC Motors

#### **Product Description**

The CT310 is a 2D angular sensor in a dual full-bridge configuration from Crocus Technology developed on its patented XtremeSense® 2D TMR technology. The operating magnetic field for this 2D sensor is 25 mT to 90 mT and has an angular error less than 0.30° after compensation over the full operating temperature range. Unlike linear sensors, the CT310 operates in saturation mode and as such the effects from an external magnetic field has minimal impact on its performance. The CT310 has excellent performance which helps it to achieve excellent stability over the full temperature range. It has differential outputs for both sine (SIN) and cosine (COS) axes and operates with a supply voltage range from 1.0 V to 5.5 V.

It is packaged in an 8-lead TSSOP package and for applications where space is critical, a low profile, small form factor 8-lead DFN package that is  $2.00\times2.00\times0.45$  mm in size. The CT310 is also made available in die form where it will be shipped as unsawn wafers (wafer map files will be provided to indicate known good die).

<sup>(1)</sup> SIN2 – SIN1 = SIN (2) COS2 – COS1 = COS

### **Absolute Maximum Ratings**

Stresses exceeding the absolute maximum ratings may damage the CT310 and may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

#### **Recommended Operating Conditions**

The Recommended Operating Conditions table defines the conditions for actual operation of the CT310. Recommended operating conditions are specified to ensure optimal performance to the specifications. Crocus Technology does not recommend exceeding them or designing to absolute maximum ratings.

### **Applications Information**

The XtremeSense TMR sensor location for the CT310 for the x, y dimensions are shown in Figure 9 and Figure 10 for the TSSOP-8 and DFN-8 packages respectively. Figure 11 and Figure 12 illustrates the location of the CT310's XtremeSense TMR sensor from the z dimension. All dimensions in the figures below are nominal.

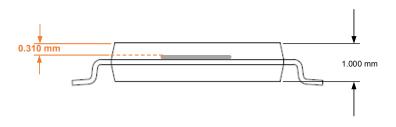

1.00 mm

- (1) RoHS is defined as semiconductor products that are compliant to the current EU RoHS requirements. It also will meet the requirement that RoHS substances do not exceed 0.1% by weight in homogeneous materials. Green is defined as the content of Chlorine (CI), Bromine (Br) and Antimony Trioxide based flame retardants satisfy JS709B low halogen requirements of ≤ 1,000 ppm.
- (2) MSL Rating = Moisture Sensitivity Level Rating as defined by JEDEC standard classifications.
- (3) Package will withstand ambient temperature range of -40°C to +150°C and storage temperature range of -65°C to +165°C.
- (4) Device Marking for TSSOP is defined as CT310LS-XT8 YYWWSS where CT310LS = base part number, X = temperature code, T8 = TSSOP-8 package, YY = year, WW = work week and SS = sequential number. DFN is defined as 300X where X = temperature code and Y = year, WW = work week and S = sequential number.
