STPS10L25

Low drop power Schottky rectifier

Datasheet - production data

Features

- Very low forward voltage drop for less power dissipation
- Optimized conduction / reverse losses tradeoff which means the highest efficiency in the applications
- Avalanche capability specified
- ECOPACK[®]2 compliant component for D²PAK on demand

Description

Single Schottky rectifier suited to switched mode power supplies and high frequency DC to DC converters.

This device is especially intended for use as a rectifier at the secondary of 3.3 V SMPS units.
