

This range of enclosures is attractively styled and especially designed for use as a compact instrument enclosure. They are available with either push buttons, a clear display window or a solid cover.

Applications: alarm and security systems • industrial test equipment • receivers • transmitters • telecommunications • pocket modems • audio and video controls • computer interface.

SOAP

DESIGN

ABS enclosures with rounded corners, convenient to carry and snaps together for easy assembly. Base and cover have integral PCB mounting studs. The enclosures "10006/1" and "10006/2" are available with one or two cutouts for connectors or cables (14,7 x 12,5 mm). Matt surface finishing. Only the model "10014" is available in black or white.
