17
TOOLS

It features 17 all-locking tools. All locking features means that every tool and knife on the body of the handle, with the exception of the plier head, will lock into place. The all locking design enables the user to operate individual tools safely and effectively. By locking them into place when fully open, the user can put pressure on the implement while safely completing the job, before manually unlocking the tool to stow it away. 100% stainless steel construction and removable wire cutters. The secure ring is for attaching the tool safely and securely to a lanyard. Often people who work near water or on scaffolding attach their tool to a lanyard on their person to avoid losing the tool if it's dropped.
